

AXON ENTERPRISE INC. (AXON)

October 21, 2024

Industrial Manufacturing

| mivestificate friesis |
|--|
| Axon provides law enforcement with an integrated ecosystem of hardware and |
| software solutions. Hardware includes TASERs, body cameras, fleet cameras, |
| drones, and sensors. Software consists of three platforms: Evidence, Records, |
| and Respond. Our investment thesis centers on software services growth. |
| Software licenses generate higher margins than hardware. We expect |
| improved top and bottom-line performance as software becomes the |
| dominant revenue driver. Despite our positive sentiments, the market fairly |
| values Axon's stock, providing investors with limited upside. For this reason, |
| we recommend no action at current market prices. |
| |

Investment Thesis

Drivers of Thesis

- Software services are expected to drive future growth, increasing from 38 percent of sales in FY23 to 60 percent in FY33. As a higher-margin segment, services will enhance revenue and profitability, with gross margins projected to rise from 61 to 67 percent over this period.
- Public mandates for police accountability and transparency serve as enduring tailwinds, fueling demand for Axon's products, such as body cameras, which are currently used by 82 percent of U.S. law enforcement agencies. This, in turn, reinforces Axon's integrated hardware-software ecosystem.
- Axon's existing body camera fleet provides a valuable source of training data for AI and machine learning algorithms. Leveraging this data will enhance Axon's AI capabilities, making its software services more compelling. We expect AI to be a cornerstone of Axon's future.

Risks to Thesis

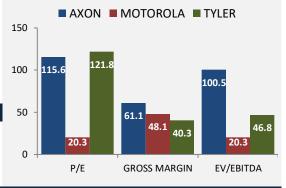

Slower-than-expected growth in software services poses a significant risk.
 The investment thesis heavily depends on services becoming the primary revenue driver, projected to reach 60 percent of total sales by 2033. Any delays in software adoption, pricing pressure, or competition could result in lower-than-expected margins, hurting overall profitability and potentially leading to a downward revision of our growth assumptions.

Axon Enterprise, Inc. provides public safety technology, focusing on developing integrated hardware and software solutions for law enforcement, federal agencies, and enterprise security. Axon's products range from TASER conducted energy devices to body cameras and digital evidence management systems. Software services are becoming a larger share of sales and improving profitability.

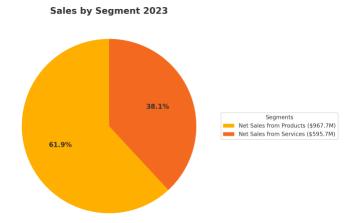

Company Description

COMPANY DESCRIPTION

Axon sells law enforcement and public safety agencies an integrated ecosystem of non-lethal hardware, cameras, and software services. The Company's hardware portfolio includes TASER conducted energy devices (CEDs), bodyworn cameras (BWCs), in-car video systems, drones, and other sensors to enhance situational awareness and improve police accountability. Axon's software services include a cloud-based digital evidence management platform and a real-time operations platform. Axon's hardware-software synergies generate a profitable, sticky ecosystem with high switching costs. Using an Axon body camera or TASER device becomes more valuable with a subscription to Axon's software services. This creates a strong incentive for customers to buy Axon products when evaluating future hardware options. Axon has \$7.4 billion in future contracted revenue (as of the end of Q2 FY24) and expects to recognize between 15 to 25 percent over the next 12 months.6

Revenue Segments

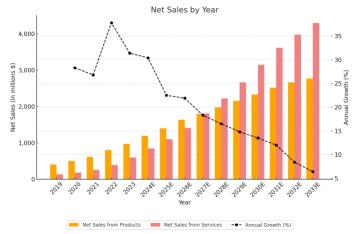

Source: Axon 10-K (2023)

Axon reports two segments: products and services. The products segment accounted for 62 percent of sales in 2023, contributing a gross margin of 60.5 percent. We expect steady growth over the forecasted period. The services segment represents a minority of sales at 38 percent in 2023 but is growing rapidly. We forecast faster and sustained growth for this segment, with services increasing as a percentage of total sales. Services maintain a relatively higher gross margin at 72.6 percent and provide Axon with recurring revenue. By 2033, we forecast a 40/60 split between products and services revenue,

respectively. The shifting mix towards higher margin services contributes to strong operating leverage, increasing overall profitability. The graphic below illustrates historical and forecasted sales through 2033. Our model forecasts positive yet decelerating growth through 2033. We expect services to overtake product sales in 2028.

Source: Axon 10-K (2023)

Products

The products segment includes TASER devices, cartridges, body cameras (and related accessories), fleet video cameras, and a catch-all "other" category comprising smaller revenue ventures like aerial drones and VR.

Our model incorporates the following five-year growth assumptions for the products segment:

| | 2024 | 2025 | 2026 | 2027 | 2028 |
|-----------|------|------|------|------|------|
| HF | 23% | 18% | 16% | 10% | 10% |
| Consensus | 23% | 17% | 16% | - | - |

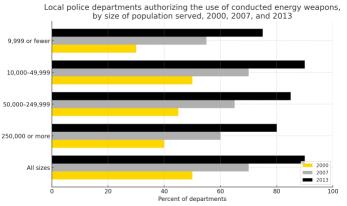

Source: FactSet

TASER Devices (Professional): TASER is Axon's brand of conducted energy devices (CEDs), a non-lethal alternative to firearms. CEDs fire electrical charges via disposable cartridges that temporarily incapacitate individuals. Over 15,000 law enforcement and military agencies use CEDs.¹⁷

Between 2000 and 2013, the share of local police departments permitting officers to use TASERs and other CEDs rose from 7 to 81 percent.¹⁴ The graphic below shows the authorized use of CEDs by population size. The data shows a clear trend towards greater CED adoption across all population sizes. Safety benefits are a chief reason for this trend. In the field, studies show overall officer injury

rates declined after the introduction of CEDs and also reduced the rate of suspect injury by 70 percent compared to physical force methods. ^{15, 16}

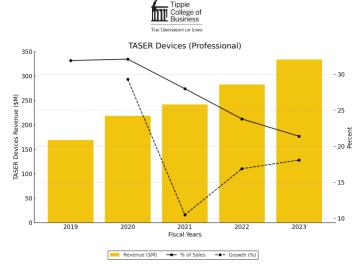

Source: Bureau of Justice Statistics

Axon's TASER 10 (see below) features a new propulsion system, enabling multiple shots at extended ranges compared to older models. TASER 10 has a maximum range of 45 feet and can discharge 10 individually targeted probes before reloading.³ Axon's TASER lineup includes other CEDs that differ in range, cartridge size, and other features.

Source: AUSA

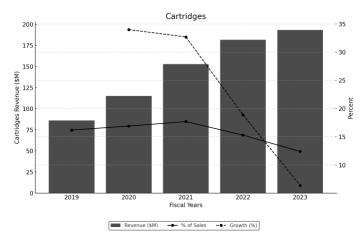

TASER devices contributed \$334 million or 21.4 percent of total sales in 2023.¹ The TASER devices segment grew 18.1 percent YoY, trailing overall sales growth of 31.1 percent. Through the first half of FY24, TASER devices sales totaled \$203.3 million or 21.1 percent of sales (down 30 bps from FY23). We could not find specific data for Axon's share of the CED market, but according to The Verge, Axon is a "taser monopoly" with an "overwhelming majority of United States police departments carry[ing] Axon's tasers."¹⁴ Sustained public demand for non-lethal deterrence in light of controversial uses of force in recent years serves as a long-term demand driver.

Source: Axon 10-K (2023)

Cartridges: Axon's TASER devices rely on single-use cartridges that contain the electrical probes needed to operate. Customers must purchase cartridges separately, either in bulk or through unlimited purchase agreements with Axon. This arrangement provides reoccurring revenue, with customers needing to restock cartridges to keep their devices operational.

Axon generated \$193.3 million in cartridge sales in 2023, representing 12.4 percent of total sales. The cartridge segment grew 6.4 percent last year, a sharp deceleration from 2022's 18.9 percent growth rate. Bulk cartridge purchases can result in irregular growth rates for this product segment. In the first half of FY24, Axon sold \$121.6 million in cartridges, equivalent to 12.6 percent of sales. Over the long term, we expect cartridge sales to remain steady and grow at a rate consistent with TASER devices.

Source: Axon 10-K (2023)

Axon Body Cameras and Accessories: Axon sells bodyworn cameras (BWCs) designed to increase accountability. The top-line model, Axon Body 4, has a high-definition

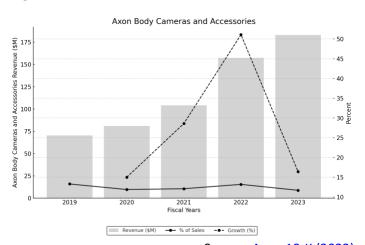

camera, expanded field of view, battery life to sustain a full shift, livestreaming support, and real-time location data. Axon sells older models with reduced functionality.¹

Axon's primary customers for body cameras are law enforcement agencies, U.S. federal agencies, corrections, fire and emergency personnel, attorneys (litigation, evidentiary discovery), and the U.S. military. Potential customers include private security, healthcare, public transportation, and insurance companies.

The public's demand for transparency and improved accountability are drivers of BWC adoption across all law enforcement agencies in the U.S. A recent survey found that 82 percent of agencies in the U.S. use BWCs.¹⁸

The video data collected on Axon's BWCs is extremely valuable for training Al. Scaling laws forecast improved model performance the more training data used. Axon can leverage its vast number of BWCs to capture data at scale, thereby improving the performance of its Al. Customers must provide consent to use the data.

Body cameras and accessories accounted for \$183 million of sales in 2023, up 15.2 percent YoY. The release of Axon Body 4 occurred in Q2 FY23. The segment contributed 11.7 percent of sales in 2023. In the first half of FY24, body cameras and accessories totaled \$110.2 million, or 11.4 percent of sales. We forecast strong growth in this segment.

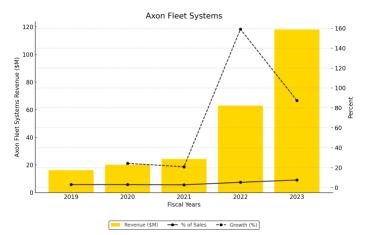

Source: Axon 10-K (2023)

Axon Fleet Systems: Axon's Fleet systems include in-car video systems that integrate with its digital evidence management platform. Fleet systems capture video from outside and within vehicles, capture license plate information, and provide real-time positioning data. Axon

fleet systems integrate with Axon Evidence (discussed below) to automatically upload footage and other evidence.

In 2023, the fleet systems segment generated \$118.1 million in sales, up 87.5 percent year over year. The increase is primarily due to higher unit sales. The segment as a whole is fast-growing, with a five-year CAGR of 64.3 percent. In the first half of FY24, the Fleet segment generated \$55 million in sales, representing 5.7 percent of sales (down from 7.6 percent in 2023).

Source: Axon 10-K (2023)

Other: This segment includes the following products: TASER Consumer, VR Hardware, Signal Sidearm, and Axon Air. Combined, other products and services contributed \$39.8 million or 2.5 percent of total sales in 2023.¹ In the first half of FY24, the segment generated \$25.9 million, or 2.7 percent of total sales.⁶

TASER Consumer adapts Axon's professional CED technology for the consumer market. This line includes self-defense devices like the TASER Pulse, which temporarily incapacitate attackers. TASER Consumer devices compete with other modes of self-defense, such as pepper spray.

Axon's virtual reality (VR) business provides immersive experiences designed to train law enforcement and other public safety officers.¹ Axon's VR systems simulate realworld scenarios, allowing officers to practice de-escalation tactics in a controlled environment. The video captured from BWCs provides useful data to improve the effectiveness of VR experiences.

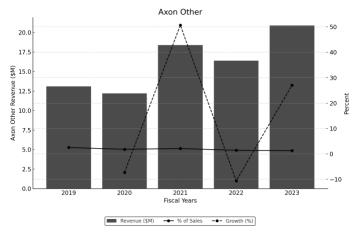

Signal Sidearm is a smart sensor that attaches to firearm holsters, activating body cameras when a weapon is

Tippie
College of
Business
The University of low

drawn. The sensor captures critical moments before and after a firearm is used.¹

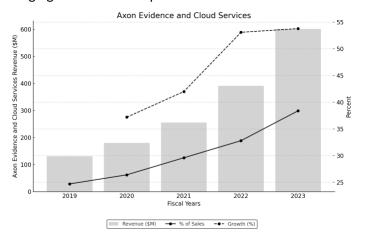

Axon Air uses drone technology to give police departments real-time aerial situational awareness. Axon Air devices live stream footage and integrate with Axon's software ecosystem to provide location data and upload digital evidence. Drone operators may manually fly the drone or use autonomous mapping features to designate a predesigned route. The recent acquisition of Dedrone suggests Axon views this as an emerging market.

Source: Axon 10-K (2023)

Services

Axon offers three service platforms: Axon Evidence, Axon Records, and Axon Respond.¹ Customers sign multi-year contracts for a license to access these platforms. The average contract is five years. Various tiers are available, ranging in features and price.

Source: Axon 10-K (2023)

Services sales are growing quickly. In FY23, service sales totaled \$595.7 million, a 53.3 percent increase compared

to \$388.5 million in FY22.¹ Services gross margin declined 70 bps to 72.6 percent, mainly due to a higher proportion of lower-margin professional services.¹

Axon Evidence: Axon Evidence is a digital evidence management platform for securely storing, managing, and sharing digital evidence.⁵ Customers can access their data remotely using the online portal Evidence.com.

Three tiers are available: Basic, Pro, and Pro+. Basic is a free version for those who only need to upload evidence. Most officers require a paid tier. Pro+ includes access to advanced AI features. Pro and Basic users can also purchase AI features as add-ons for a premium. Storage and unlimited storage plans are available for an additional monthly fee.²²

Axon Evidence is tightly integrated with Axon's broader hardware ecosystem, including body and fleet cameras, TASER devices, and other sensors. Axon's devices automatically upload data to Axon Evidence via the cloud, saving officers time and ensuring important evidence is safely retained. This integration also enables timely access, making it faster for agencies to review, tag, and categorize evidence.⁴

Key AI features include automatic redaction (faces, license plates, audio, screens, etc.), audio transcription, multicamera synchronization, data cataloging, and more.⁵

Axon Records: Axon Records is designed to streamline the report writing process. It employs a mobile app that allows officers to quickly write incident reports from anywhere in the field.⁷ The platform integrates with Axon Evidence, allowing officers to attach relevant evidence. Officers can also review evidence captured using the mobile app.

Axon leverages its AI to automate writing incident reports using Draft One. Using data from various Axon devices, including body and vehicle footage, GPS location data, and audio recordings, the software summarizes events into a cohesive final report.²²

Axon Respond: Axon Respond is a real-time operations platform that provides situational awareness and coordination for public safety agencies. It integrates live video streaming, GPS location tracking, and automatic signal alerts, providing insights on ongoing incidents. Axon Respond helps police departments and public safety agencies manage personnel and other resources during emergencies, improving response times and coordination.

Two tiers are available: Respond and Respond+. Respond users can display their coordinates on a digital map and send alerts to the platform. Respond+ adds live streaming capabilities in addition to the regular Respond features.²³

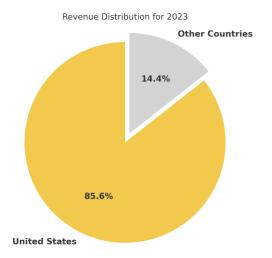

Our model incorporates the following five-year growth assumptions for the services segment:

| | 2024 | 2025 | 2026 | 2027 | 2028 |
|-----------|------|------|------|------|------|
| HF | 42% | 33% | 30% | 28% | 23% |
| Consensus | 42% | 31% | 32% | - | - |

Source: FactSet

Geographic Segments

Axon's CED devices require an export license to be sold abroad (except for Canada). Importing countries may also impose their own regulations on CEDs, which may limit Axon's addressable market. In 2023, the U.S. accounted for 86 percent of sales, up from 83 percent in 2022. Despite decreasing as a percentage of revenue, international sales grew YoY due to strong demand from other countries in the Americas region. 1

Source: Axon 10-K (2023)

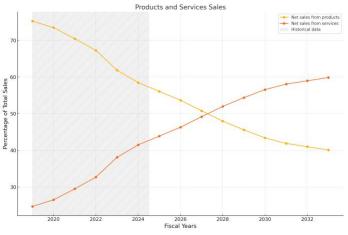

Cost Structure Analysis

| Gross Margin | | | | | | | |
|----------------|-------|-------|-------|--|--|--|--|
| 2023 2022 2021 | | | | | | | |
| Products | 53.4% | 54.7% | 57.3% | | | | |
| Services | 73.6% | 74.7% | 75.5% | | | | |
| Total GM | 61.1% | 61.2% | 62.7% | | | | |

Source: Axon 10-K (2023)

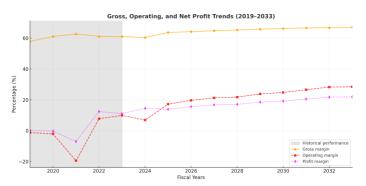

Axon's gross margins deteriorated slightly YoY (see table above). Product gross margin declined due to inventory

and warranty charges related to the TASER 7, higher costs from the TASER 10 launch, and increased manufacturing expenses. The fall in services gross margin stems from a greater mix of weaker margin services.¹

Source: Axon 10-K (2023)

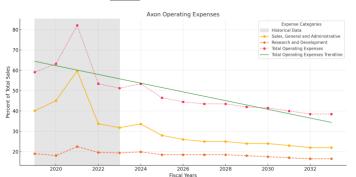

We forecast services contributing a larger share of sales, reaching 59.9 percent by 2033, up from 38.1 percent in FY23. Services will overtake products as a percentage of total sales in 2028. The growth of the higher-margin services segment is poised to improve top and bottom-line financial performance (see profit trends graph below).

Source: Axon 10-K (2023)

Historical trends show operating expenses declining as a percentage of total sales. A larger mix of higher-margin services explains this operating leverage. We forecast SG&A to fall to 22 percent by 2033 as software services become a larger share of our total revenue estimate.

Source: Axon 10-K (2023)

Debt Maturity Analysis

Axon has a debt structure that includes \$678.7 million in 0.50% senior convertible notes due December 15, 2027.⁶ Axon entered into a convertible note hedge transaction to reduce the potential impact of dilution upon conversion.¹ The effective interest rate on the convertible notes is 0.99% when considering issuance costs.¹ The Company has access to a \$200 million revolving credit facility, with the option to increase the limit to \$300 million.¹ The facility is currently undrawn.¹

Five-Year Debt Maturity Schedule

| Fiscal Year | Coupon (%) | Payment (\$M) |
|-------------|------------|---------------|
| 2024 | - | 0 |
| 2025 | - | 0 |
| 2026 | - | 0 |
| 2027 | 0.50% | 678.7 |
| 2028 | - | 0 |
| Thereafter | - | 0 |
| Total | | \$678.7 |

Source: Axon 10-K (2023)

ESG Analysis

Axon earned a high-risk rating with an ESG score of 30.5, according to Morningstar's Sustainalytics.⁸ Relative to the Aerospace & Defense industry group, Axon ranks 31 out of 105. For comparison, Motorola, its closest competitor, earned a low-risk rating with an ESG score of 12.4 (Motorola falls into the Technology Hardware industry, not Aerospace & Defense like Axon, which may explain the superior ESG score).⁹

Axon's Board is comprised of ten directors, evenly split between men and women. The management team consists of 12 executives, 75 percent of whom are men. Insiders own 5.1 percent of the Company's stock.

To further Axon's commitment to improving public safety and policing, the Company formed an Ethics & Equity Advisory Council (EEAC). The EEAC acts as an independent advocate for marginalized communities and provides feedback on Axon's products and services. While an important voice, the EEAC does not set the Company's ethical guidelines or make final decisions on product development.

Moving forward, integrating AI into Axon's products and services will be a top ESG concern. To avoid exacerbating racial biases, the Company will need to ensure the integration of AI technology is ethical and safe. Axon recognizes the importance of this issue and engages with its EEAC to receive feedback.¹⁰

RECENT DEVELOPMENTS

Q2 FY24 Earnings

Axon reported Q2 earnings on August 6, 2024. Actual EPS performance beat estimates by 17.7 percent (\$1.20 vs \$1.02), causing the stock to jump significantly following the earnings release (see chart below).

Source: FactSet

During the quarter, Axon generated \$504.1 million in sales, a 34.5 percent increase compared to Q2 FY23. Strong product and service sales drove sales growth. Product sales rose to \$295.2 million, a 26.4 percent increase largely due to higher demand for TASER devices and cartridges. Services sales grew 48 percent YoY to \$208.9 million, driven by the expansion of Axon Evidence and cloud services subscriptions.⁶

Operating expenses in the quarter totaled \$270.9 million, a 41.2 percent increase from Q2 FY23. The YoY increase is due to higher investments in R&D and SG&A expenditures;

both increased as a percentage of sales relative to Q2 FY23 (see table below).⁶

| % of sales | R&D | SG&A |
|------------|--------|--------|
| Q2 FY23 | 32.0% | 19.2% |
| Q2 FY24 | 33.6% | 20.1% |
| Net change | + 1.6% | + 0.9% |

Source: Axon 10-Q (Q2 FY24)

R&D spending grew 41 percent to \$101.4 million due to personnel-related expenses, including a jump in stock-based compensation and increased headcount. SG&A expenses increased 41.3 percent to \$169.4 million, driven primarily by Axon's 2024 CEO Performance Award, increased personnel costs, and efforts to support further global expansion.

Axon generated net income of \$40.8 million, a 228.7 percent increase from \$12.4 million earned in Q2 FY23. A key contributor was a \$7.9 million gain from strategic investments in Q2 FY24, which partially offset the rise in operating expenses. The strategic investment was a noncash unrealized gain for marketable securities on the balance sheet.⁶ Additionally, Axon reported a \$62 million expense under its "other" category in Q2 FY23.

Fusus Acquisition

On January 31, 2024, Axon acquired the remaining 79.7 percent interest in Fusus, LLC. Axon paid approximately \$241.3 million. Terms of the deal remain undisclosed. Fusus is a real-time crime center platform. The platform is open-source and integrates with many data sources to improve operations. Axon believes the acquisition will improve its ability to aggregate live video, data, and sensor feeds to improve situational awareness. Transaction costs for the deal totaled \$0.9 million in Q2 FY24 and were recorded as an SG&A expense. Axon recorded \$250 million in goodwill.

The market initially responded poorly, dropping 2 percent following the announcement. However, it recovered in the subsequent week, posting gains for seven consecutive days. We agree with the market's positive reception, believing the merger will offer cost-saving synergies when

combined with the Company's existing operations platform: Axon Respond.

Source: FactSet

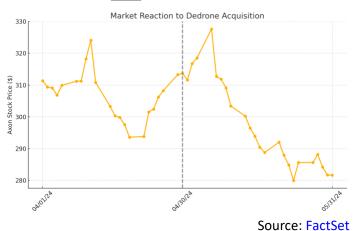

Dedrone Acquisition

On April 30, 2023, Axon entered into a definitive agreement to acquire the remaining stock of Dedrone Holdings, Inc. for \$400 million. Axon already had a 20 percent interest in Dedrone.⁶ Dedrone is a leader in air space security and helps its customers respond to aerial threats by detecting, tracking, identifying, and defeating drones.¹² Dedrone employs various sensors, cameras, and radars in conjunction with its software and Al alogrithms.¹²

The acquisition signals Axon's commitment to making drone technology a major revenue driver. Dedrone's website advertises the following industries as potential customers: the federal government and military, public safety, correctional facilities, critical infrastructure, airports, enterprises, and private property.¹²

The market initially had a neutral reaction, rising 0.11 percent before falling over the weeks thereafter. We disagree with the market's sentiment towards the deal. As noted in the industry trends section below, aerial drones are a growing segment and represent a genuine threat to public, private, and enterprise safety. Axon is wise to position itself towards the aerial defense business.

INDUSTRY TRENDS

Artificial Intelligence

Al has become an important tool for police officers and other public safety personnel. Its most helpful application today is automating routine clerical tasks. These tasks include writing incident reports, redacting sensitive information from evidence, and cataloging evidence. Clerical work consumes a significant portion of an officer's day. Using camera and sensor data, Al models automate the entire process. Police departments demand these services because they allow officers to spend less time on paperwork and more time engaging with the community. Al is also used to make better, more informed operational decisions, helping allocate resources such as police and emergency services during crises. Lastly, Al improves VR training experiences to improve decision-making in tense situations.

Axon is well-positioned to capture value from AI. The Company's extensive network of cameras and sensors generates massive amounts of data, which can be used to train AI models. Axon's software expertise and family of devices is a strong advantage and contributes to its competitive moat. The recent Fusus acquisition also gives Axon access to AI that intelligently alerts law enforcement to emerging threats.²⁴

Aerial Drones

The commercialization of affordable drone technology creates a valuable tool and a growing threat to public safety. As a helpful tool, drones provide police departments with an aerial view of a situation, giving better context and situational awareness. Police

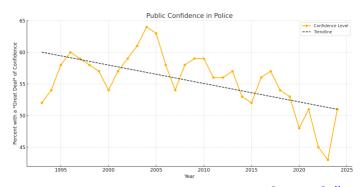

departments can also deploy drones to observe situations from safe distances.

Not all drone use cases serve the public good. The Russia-Ukraine war highlights the effectiveness and lethality of small, inexpensive consumer drones. The industry is developing defense measures, including radar sensors and frequency jammers, to mitigate the risk of malicious drone use over sensitive areas.

Aerial drones represent an ongoing threat to public safety, given their low cost and widespread commercial availability. The threat to safety will likely extend beyond the public domain, including enterprises. Disrupted operations due to an act of drone sabotage could prove costly. Axon is smart to invest in drone oversight and defensive technologies. The Dedrone acquisition positions Axon to capture market share in this emerging industry.

Accountability and Transparency

The graph below shows 30 years of public response data to the question, "How much confidence do you, yourself, have in the police -- a great deal, quite a lot, some or very little?" Despite a recent uptick in confidence, the overall trend line is clear: public confidence in the police is falling. To earn back this trust, police departments and local legislatures are focusing on ways to improve accountability and transparency.

Source: Gallup

One major trend is the adoption of body-worn cameras (BWCs). BWCs provide an unbiased perspective of events, telling the story as it happened. A Pew Research Center study indicates that Americans and law enforcement officers generally back using BWCs.²⁵ Research also shows that body cameras can reduce complaints against officers and instances of force, leading to more cautious behavior and greater citizen satisfaction.¹⁹ Additionally, the shift

toward less-lethal options, like Axon's TASER devices, reflects efforts to reduce gun-related incidents while ensuring public safety. We do not foresee a reversal in public opinion relative to these trends, which bodes well for Axon's business.

MARKETS AND COMPETITION

Motorola Solutions, Inc. is Axon's closest competitor in providing hardware and related software services. Motorola does not sell CEDs. Tyler Technologies, Inc. develops software solutions tailored for government agencies, helping cities, states, and the federal government manage public safety, justice, health, finance, and education services.

Peer Comparisons

| As of 10/19/24 | As of 10/19/24 Axon | | Tyler | |
|----------------|----------------------------|--------|---------|--|
| Market cap | \$33.1B | \$79.3 | \$25.1B | |
| EV | \$32.8B | \$84.8 | \$25.5B | |

| Forward P/E | 69.9 | 31.9 | 55.6 | |
| P/S | 18.6 | 7.8 | 12.5 | |

Source: Yahoo! Finance

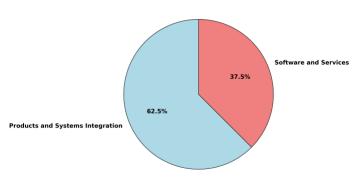

Motorola Solutions (MSI): In 2023, Motorola's total sales rose 9.5 percent to \$10 billion. The Products and Systems Integration segment, comprising two-way radios, broadband devices, video security systems (including body and fleet cameras), and command center solutions, contributed 63 percent of sales.

Software and Services segment, which includes software solutions, cloud-based and managed services, generated 37 percent of sales. Like Axon Evidence, this segment includes a "video-as-a-service" option, bundling hardware with evidence management software. Operating earnings increased 38 percent to \$2.3 billion.

Motorola's gross margin increased from 46.4 to 49.8 percent, driven by higher sales and lower direct material costs. Due to increased employee incentives and acquisition costs, SG&A expenses rose 8 percent (\$1.45B to \$1.56B). R&D spending grew 10 percent (\$779M to \$858M), representing 8.6 percent of sales.

Motorola Sales by Segment in 2023 (in billions)

Source: Motorola 10-K (2023)

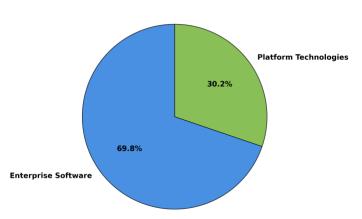

Tyler Technologies (TYL): Tyler Technologies generates revenue from two segments: Enterprise Software and Platform Technologies.²⁷ Enterprise Software includes public administration, courts, public safety, and education solutions.²⁷ It earns revenue through SaaS subscriptions, maintenance contracts, software licenses, and professional services like implementation and training.²⁷ In 2023, this segment generated \$1.4 billion, with an operating margin of 32.3 percent.²⁷

The Platform Technologies segment includes transaction-based services like payment processing and data management.²⁷ Revenue is generated through transaction fees, cloud services, and add-on software.²⁷ In 2023, platform technologies reported \$594.8 million in sales, with an operating margin of 20.9 percent.²⁷

Overall, Tyler's sales grew 5.5 percent to \$2.0 billion. Recurring revenues from SaaS and maintenance contracts were major drivers. Gross profit increased 9.8 percent to \$861.1 million, and gross margin improved from 42.4 to 44.1 percent. Operating income was \$218.5 million, 2 percent higher YoY. The Enterprise Software segment's revenue rose 7.4 percent, while Platform Technologies grew 1.3 percent.

| ROIC | 8.1% | 27.6% | 4.6% |

Source: FactSet

The FY23 performance comparison reveals that Motorola outperforms Axon and Tyler across most metrics. Motorola's large scale, diverse product offerings, and operational efficiency drive higher revenue, margins, and returns (ROA, ROE, ROIC). Comparatively, Motorola is a more mature business than Axon.

Although Axon has the highest gross margin (61.1%), it is a fast-growing company with investments in R&D leading to more modest performance. Tyler, specializing in public sector software, shows lower margins and returns, reflecting longer development cycles and higher costs.

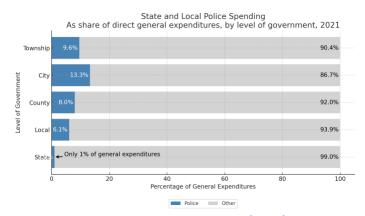

ECONOMIC OUTLOOK

Axon's financial performance is heavily dependent on the fiscal health of state and local governments, which provided 87 percent of police funding in the U.S. in 2021.²⁸ Local governments include cities, counties, and townships. The graph below shows that 6.1 percent of local

Tippie College of Business

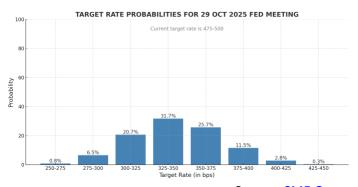

government spending goes toward police departments. Across local governments, cities allocate the largest percentage of their general expenditures towards police budgets (13.2%), followed by townships (9.6%) and counties (8%).

Local government spending, and by extension, police budgets, rely heavily on tax revenue.²⁹ The primary tax sources include income, sales, and property taxes. Local governments rely most heavily on property taxes, providing 70 to 75 percent of local government revenues.²⁹ Property taxes are assessed based on the property's value and local tax rates. Inflation and interest rates are important factors that influence the property market.

Source: The Urban Institute

On September 18, 2024, the Federal Reserve cut interest rates by 50 basis points, lowering the federal funds target range to 4.75-5.00 percent. This rate cut signals a shift in the Fed's strategy to manage inflation, reaching a high of 9.1 percent in 2022. Market forecasts suggest further rate reductions over the next 12 months, with a plurality expecting the target range to fall to 3.25-3.50 percent. The chart below illustrates the probability distribution for the federal funds rate in one year.

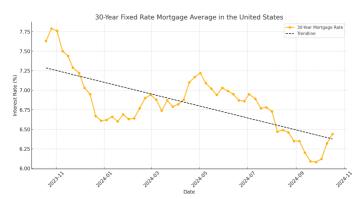

Source: CME Group

If interest rates continue declining as predicted, this could significantly affect property values and taxes. Lower interest rates generally reduce the cost of borrowing, ultimately boosting the demand for real estate, leading to higher prices. Rising property values generate more property taxes and tax revenue to fund local budgets, including the police.

Investors should monitor the 30-year average fixed-rate mortgage rate to gauge the direction of property value movement. The trendline over the past year is favorable for Axon since falling mortgage rates induce greater demand for real property, thereby driving up valuations and tax revenues.

VALUATION

We anticipate a gradual deceleration in growth for Axon's Products and Services divisions as the company enters a more mature phase of its growth cycle. Product growth is projected to decline from 25% in 2024 to 4% by 2033, reflecting market saturation and slowing hardware adoption as devices reach widespread deployment. Services growth, initially strong at 42% in 2024, is expected to taper to 8% by 2033 as high adoption rates transition to a stable, recurring revenue model. These trends align with Axon's strategy to leverage product-led growth as a foundation for building a sustainable services revenue stream.

Operating Expenditures

Cost of Sales: The cost of sales (as a percentage of sales) equals the five-year average for products (45.4%) and services (24.7%). We hold this constant over the forecasted period. Gross margin improves as services increase as a share of total sales. The shifting mix results in

a gross profit margin of 67 percent by 2033, up from 61.1 percent in 2023.

SG&A: SG&A is forecasted as a percentage of sales. It expected to decline steadily from 2025 to 2033, driven by operating leverage as fixed costs are spread over growing sales. This trend reflects Axon's ability to manage overhead expenses while scaling its operations, buoyed by services sales.

R&D: We project Axon's R&D spending as a percentage of sales to gradually decline over the forecast period, reflecting a strategic focus on operating efficiency while sustaining innovation. From 2024 to 2028, R&D expenses are expected to hold steady at 18.5% of sales, demonstrating continued investment in product development and technological advancements during this growth phase. Starting in 2029, we anticipate a gradual decrease, with R&D spending tapering to 16.5% of sales by 2032 and stabilizing at that level through 2033. This trend underscores Axon's ability to scale R&D more efficiently as its platforms mature and incremental development demands fewer resources. These projections align with Axon's strategy to balance innovation with long-term margin expansion.

Capital Expenditures

Axon's management does not provide capital expenditure guidance. We incorporate consensus estimates through FY26, projecting a gradual decline in capex as a percentage of sales through the terminal year. This reflects the assetlight nature of Axon's scaling software business, which relies primarily on third-party hosting for its services. As a result, we anticipate minimal asset requirements relative to Axon's future revenue generation.

Cost of Capital

The weighted average cost of capital (WACC) is 10.4 percent. Our WACC estimate incorporates the following assumptions:

Risk-Free Rate: 3.97% – YTM 10Y US Treasury
 Beta: 1.21 – Average 1Y, 2Y, 3Y Weekly Beta
 Equity Risk Premium: 5.0% – HF estimate

• Cost of Equity: 10.6% – CAPM

• Equity Weight: 97.9%

• **Pre-Tax Cost of Debt:** 5.0% – Bloomberg estimate

Marginal Tax Rate: 24.0%

After-Tax Cost of Debt: 3.8%

• Debt Weight: 2.1%

DCF/EP Model

Our DCF and EP models yielded a share price of \$433. The following assumptions were used:

• CV Growth of NOPLAT: 5.0%

• CV Year ROIC: 218.7% using 2033E ROIC

The DCF/EP model is our preferred estimate of Axon's intrinsic value. It best captures the value of increasing service sales and overall margin improvement. Our DCF/EP is sensitive to the discount rate since a large proportion of the share price derives from Axon's continuing value. Changes to the WACC, Beta, ERP, or CV Growth can result in material price differences. At a current market price of \$438, Axon is trading at a 1.1% premium compared to our DCF/EP price. For this reason, we recommend no action.

Fundamental P/E Model (DDM)

The DDM estimates Axon's intrinsic value based on future dividend payments. Using the DDM, Axon stock is worth \$135 per share. Shares currently trade at \$438. Axon's lack of a dividend skews the price. We do not forecast dividends and find the DDM materially undervalues Axon.

The assumptions include a 5.0 percent terminal EPS growth rate, ROE of 18.7 percent (2033 CV), and cost of equity of 10.6 percent.

Relative Valuation (P/E) Model

The comparable companies used to value Axon on a relative basis include Motorola Solutions (MSI), Tyler Technologies (TYL), Cadre Holdings (CDRE), IBM, and Oracle (ORCL). Cadre closely aligns with Axon's focus on public safety, as both serve law enforcement with safety and technology products. Meanwhile, IBM and Oracle, with their broader scopes, provide insights into Axon's cloud-based and Al-driven solutions, underscoring its position within the technology sector. Together, these comparisons enable a comprehensive evaluation of Axon across its core public safety market and its technological innovation. Among these peers, Tyler Technologies possesses the highest P/E multiples for both 2024 and 2025 at 64.5x and 57.0x, respectively. In contrast, IBM has

the lowest P/E multiples at 20.2x for 2024 and 19.2x for 2025. The average P/E of the peer group is 37.7x for 2024 and 32.9x for 2025.

Axon trades at a premium P/E compared to its peers. Its P/E ratios are 115.1 for 2024 and 90.5 for 2025. Using ESP estimates for FY24 and FY25, this results in a low price of \$143 and \$159. These prices do not accurately reflect the value of Axon's stock.

At a spot price of \$428, Axon is expensive on a P/E basis. Failure to meet the market's high growth expectations could result in a downward price correction.

KEYS TO MONITOR

Services Sales Growth: The investment thesis hinges on services becoming the dominant revenue stream, projected to become 60 percent of total sales by 2033 (up from 38 percent in FY23). Axon Evidence, Axon Records, and Axon Respond are expected to be the primary drivers of this growth. If services sales growth slows or margins deteriorate, the underlying thesis may need to be adjusted. Investors should monitor quarterly service sales to ensure the forecasted double-digit growth materializes soon.

Operating Leverage: Our model projects a decline in SG&A and R&D expenses as a percentage of sales over the next decade. SG&A is expected to decrease from 28 percent in 2025 to 22 percent by 2033, while R&D is projected to drop from 18.5 percent in 2024 to 12 percent by 2032. This improved operating leverage is key to increasing Axon's overall profitability.

Investors should closely monitor trends in SG&A and R&D expenses. If these expenses remain flat or increase as a percentage of sales, Axon's business may not scale as efficiently as forecasted. Major spending announcements could boost these expenses, such as new product launches or significant headcount growth.

Local Government Budgets: Axon's customers primarily include law enforcement and public safety agencies. These institutions have budgets that political actors dictate. Accordingly, factors outside their control may impact demand for Axon's products and services. Investors should monitor factors that impact local government revenues, most prominently property taxes. Rising or falling interest rates may materially impact real property valuations on which taxes are assessed.

Al Integration: Al is at the core of Axon's software aspirations. Investors should monitor press releases for new and improving features to ensure management is leveraging its data advantage from its extensive array of devices. Customer feedback should also be considered, including Axon's Al tools' functionality, accuracy, and overall reliability. Gaining customer trust is paramount to ensure long-term adoption. Lastly, given the risk of bias in Al, investors should monitor Axon's board and management team to ensure proper measures are in place to develop and deploy Al technology.
