Investment Thesis

We recommend a **HOLD rating** on Toll Brothers, Inc. (TOL) with a target price of \$161 with a potential upside of 8.5%. TOL has experienced a high level of growth since the pandemic and have firmly positioned themselves in the luxury homebuilding industry. However, we expect their growth to slow paired with stabilizing margins.

Drivers of Thesis

- We project TOL to continue to grow its units delivered by 6.8% CAGR over the next 3 years. This should help the company push through some material and labor cost headwinds.
- TOL has seen its EBIT margin expand from 7.8% in 2020 to 17.3% in 2023.
 While TOL might not sustain this high level of margin expansion, we do forecast them to remain at its elevated level and slightly improve to 18% over the forecasted period.

Risks to Thesis

- We estimate that TOL will experience a reduction in average price per unit sold after reaching an all-time high in FY23. We expect its average home price to reduce by a 3% CAGR over the next 3 years.
- The current likelihood of a recession over the next 2 years is projected at a 57% chance. A recession would likely decimate TOL's client base through a reduction in consumer spending especially within the luxury home sector. Consumers still in the homebuilding market would likely opt for some of TOL's cheaper competitors' services.

Company Description

Toll Brothers, Inc. (TOL) is an American homebuilder, founded in 1967, who designs and constructs various types of homes including single-family homes, townhomes, condominiums. TOL is known for specializing within constructing high-end residential communities due to its high focus on quality craftsmanship, customizability, and upscale amenities within its homes. The company has begun expanding into commercial real estate and land development as well.

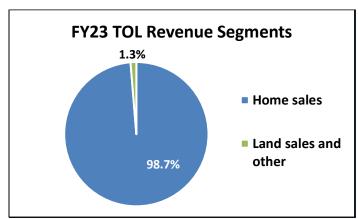

COMPANY DESCRIPTION

Toll Brothers, Inc. has a primary focus in designing and constructing upscale residential properties including single family homes, townhomes, condominiums, etc. TOL primarily generates revenue through the sale of homes the company has built and through customized homebuilding.

Homes sold by the company are often built in the form of residential communities. Consumers are also able to utilize the prominent luxury homebuilder to design their dream homes through its customizable homebuilding service. TOL is known for its dedication to high quality craftmanship and ability to offer highly customizable and upscale options/amenities to its customers. Both options make the luxury homebuilder a popular option in for upper-class citizens in the U.S. looking for a new home.

While homebuilding makes up the majority of the company's sales, TOL also has another revenue segment consisting of land development, financial services, and rentals. A revenue breakdown between home sales and land sales and other are shown below:

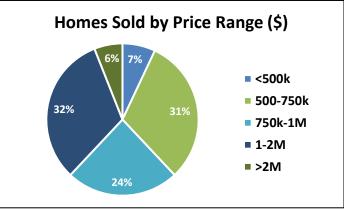

Source: TOL 10-K 2023

Home Sales

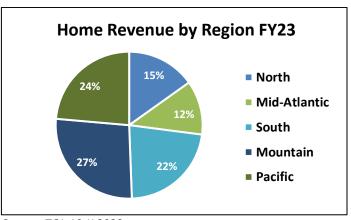

The home sales segment of TOL refers primarily to the construction of upscale residential communities for consumers across the U.S. The company prides itself on providing top tier quality of work while staying on top of the latest trends in luxury living. In FY23, the company delivered each home at an average price of \$1,028,000, representing a growth of 11.3% YoY¹. A breakdown of units delivered in 2023 by price is show below:

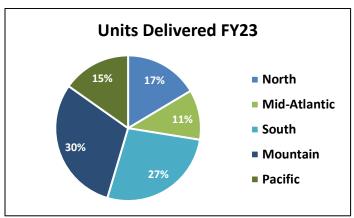

Source: TOL 10-K 2023

Despite great performance in FY2023, the average price of homes delivered has regressed to \$968,200 in Q3. While still impressive, we remained in line with consensus estimates that the average price of homes delivered will be at \$1,000,000 for FY24. This is largely due to the average price of homes delivered in TOL's South and Mountain regions being the lowest among the company's operating regions despite making up the largest portion of units delivered. A breakdown of revenue and units delivered by region in FY23 is shown below:

Source: TOL 10-K 2023

Source: TOL 10-K 2023

Toll Brothers is able to recognize home sales revenue when the home has been sold and closed. The company provides detail on the number of homes they have on backlog (under contract but not yet closed) in its annual reports. We utilized the following data from 2023 to provide some guidance on projecting future units delivered in each U.S. region which is directly tied to our revenue projections:

Region	Homes in Backlog	Home sites available
North	956	2,302
Mid-Atlantic	945	2,969
South	2,312	7,587
Mountain	1,577	9,479
Pacific	788	2,883
Total	6,578	25,220

Source: TOL 10-K 2023

Land Sales and Other

TOL's revenues from the land sales and other segment primarily derive from 4 key activities:

- Land sales to joint ventures where they maintain an interest
- Lot sales to third-party builders within their masterplanned communities
- Bulk land sales to third parties for parcels that no longer meet their development criteria
- The sale of commercial and retail properties typically located within their urban luxury condominium communities.

Notably, the land sold to joint ventures is usually sold at the company's land basis, which results in TOL receiving little to no gross margin. This approach indicates a strategic focus on maintaining long-term relationships and

interests in joint ventures, despite limited immediate profitability from these types of transactions.

Cost Structure Analysis

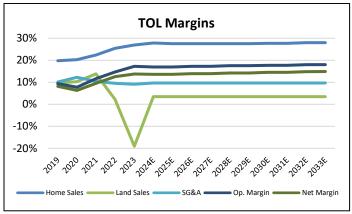

Over the past 5 years, TOL has demonstrated a consistent improvement in its home sales profit margin, increasing from 20% in 2019 to just 27% in 2023³. This trend can be largely attributed to a significant rise in the average price of homes sold, which has increased by 11.3% YoY1. This positive trend has been slightly tempered by rising costs associated with materials and labor. Looking ahead, we anticipate that TOL's home sales margin will continue to expand gradually. We project a slight regression from 27% to 26.8% until 2026 as we expect pricing power to slightly regress while lumber prices among other materials rebound from record lows. Through 2033 we project TOL will increase its margins back to 72%. While we expect the company to maintain efficient cost management practices, we foresee a slight reduction in the average price of homes sold, with an anticipated decline of 3% CAGR over the next three years. From 2027-2033, we project average price of homes sold to increase at a 2% CAGR. Both adjustments are expected to stabilize TOL's home sales margin at approximately 28% over the forecasted period.

Land sales play a very insignificant role in TOL's ability to generate profit as it is more of a strategic segment for the company. The segment historically has posted a margin between 2-15%, with 2023 being as low as -19%¹. The company buys land with hopes of developing residential communities in desirable locations. Land is often sold when the company no longer feels it will build on it or if they have a short-term need for cash. We have forecasted TOL's land sales cost margin to remain in line with its 5-year historical average at 3.4%.

TOL's SG&A expense has been strongly associated to the company's total revenue. We forecasted the company's SG&A expense at its 5-year historical average of 9.7%.

Source: FactSet, HF Estimates

Note for graph above:

- Home sales margin: Percentage of home sales revenue
- Land sales margin: Percentage of land sales revenue
- SG&A, operating margin, and profit margin: Percentage of total revenue

Debt Maturity Analysis

TOL has both fixed-rate and variable-rate debt on its balance sheet with about 73.7%¹ of total debt locked into fixed interest rates.

Five-Year Fixed-Rate Debt Maturity Schedule

Fiscal Year	Coupon (%)	Payment (\$k)
2020	4.61%	\$215,925
2021	5.48%	123,930
2022	5.12%	434,787
2023	4.83%	468,861
2024	4.30%	407,890
Thereafter	3.76%	464,374
Total	4.57%	\$2,108,799

Source: TOL 10-K 2023

Fixed-rate debt is used for the majority of the company's debt which has made its earnings and cash flows less susceptible to changes in interest rates.

Five-Year Variable-Rate Debt Maturity Schedule

Tive real variable hate best watarity selledate				
Fiscal Year	Coupon (%)	Payment (\$k)		
2024	7.10%	\$101,668		
2025	-	-		
2026	6.20%	101,562		
2027	6.20%	60,938		
2028	-	-		
Thereafter	6.20%	474,500		
Total	6.32%	\$751,668		

Source: TOL 10-K 2023

The variable-rate debt on TOL's balance sheet makes up just 26.3% of the company's total debt in 2023¹. As interest rates are expected to continue to decrease, the company's earnings and cash flows should benefit long term.

TOL's \$2.8B in total debt is low as they have a debt-to-equity ratio of just 43.9% in FY23¹. That figure has been nearly cut in half since 2020 where the company was highly leveraged at 83.8%³. We have seen a similar trend in TOL's debt-to-assets ratio going from 36.9% to 23.8% in 2020 and 2023 respectively³. We project TOL's debt-to-equity ratio to improve to 40.4% by 2026. We project the company's debt-to-assets ratio to slightly improve to 20.4% over the forecasted period.

Company	S&P
Toll Brothers	BBB-
Taylor Morrison Home	BB+
KB Home	BB+
Meritage Homes	BBB-
PulteGroup	BBB

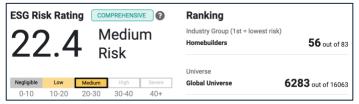

Source: FactSet

TOL boasts a BBB- rating which is slightly above the industry average. With a current ratio of 3.63x and \$1.3B in cash3, we believe Toll Brothers is well positioned to repay its debt over the forecasted period.

ESG Analysis

Environmental, Social, and Governance (ESG) are the three key factors used to assess the sustainability and social impact of an investment in a company or business. These criteria provide valuable insights into a company's potential future financial performance, including its returns and risks.

Morningstar Sustainalytics has TOL rated as medium risk with a poor ranking of 56th amongst 83 of its peers⁴. The company releases an annual ESG report for investors but there is a noticeable lack of quantifiable goals moving forward.

Source: Morningstar Sustainalytics

Company	ESG Rating	Risk Rating
Toll Brothers	22.4	Medium
Taylor Morrison Home	16.6	Low
KB Home	17.9	Low

RECENT DEVELOPMENTS

Q3 FY24 Earnings Release

In Q3 of FY24, the company reported a net income of \$374.6M (\$3.60 per share), a decrease from \$414.8M (\$3.73 per share) in the same period last year. TOL beat consensus earnings of \$3.31 per share by 8%. Pre-tax income also fell to \$503.6M from \$553M. Home sales revenues increased slightly by 2% to \$2.7B, with delivered homes rising by 11% to 2,814. Net signed contract value reached \$2.4B, an increase of 11% YoY. Backlog value decreased by 10% to \$7.1B, with homes in backlog down 7% to 6,769 units as well.

Chairman and CEO Douglas Yearley, Jr. expressed satisfaction with the company's quarterly results. He highlighted an adjusted gross margin of 28.8% that surpassed expectations due to operational efficiencies. The company saw an encouraging trend in net signed contracts, which increased by 11% in both units and dollars, particularly in July. With favorable market conditions and a solid pipeline, the company is optimistic about demand continuing into 2025. They are raising their full-year guidance for key metrics, expecting adjusted gross margins of around 28.3% and earnings of \$14.50-\$14.75 per share. The company also plans to increase share repurchases for fiscal 2024 from \$500 million to \$600 million, supported by a healthy balance sheet and strong cash flows. Our EPS projection in 2024 of \$14.61 per share lies within company guidance and is just slightly below consensus estimates of \$14.69 per share.

New Developments

Toll Brothers has been expanding its portfolio with several new developments in 2024. In Texas, the company launched a luxury community in Willis, Regency at Chambers Creek, aimed at residents aged 55 and older.

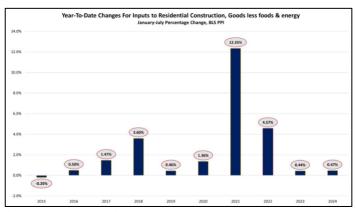

This community offers upscale amenities, including a private boat launch, nature trails, a wellness center, and a nine-hole golf course designed by PGA Tour legend Tom Lehman⁵. Homes in this development feature open-concept designs with two to three bedrooms and prices starting in the upper \$300,000s⁵.

Additionally, Toll Brothers has continued its push into the student housing market. The company recently opened "Kinetic," a luxury student apartment complex near the Georgia Institute of Technology in Atlanta. This high-end property features 239 units with amenities like study lounges, a fitness center, and a rooftop pool, catering to student lifestyles⁵. These developments reflect Toll Brothers' commitment to expanding both its luxury residential and student housing offerings across different types of consumers.

INDUSTRY TRENDS

Rebounding Material Costs

In 2024, the cost of building materials for homebuilders has shown mixed trends. Certain materials like softwood lumber have rebounded from 2023, increasing by 13% YoY¹⁷ in 2024. Steel mill product prices have declined by 14% since July 2023. Ready-mix concrete remains elevated and is up nearly 5% compared to the same period in 2023¹⁷. Overall building material prices increased modestly by about 0.47% YTD¹⁷.

Source: Eye on Housing

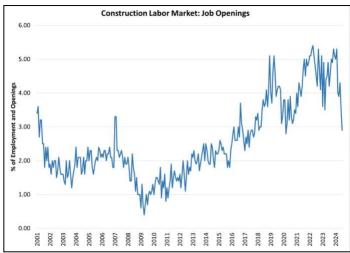

Looking ahead, there is expected to be further stabilization of material costs, with softwood lumber continuing to

increase. Overall, material cost growth is anticipated to be in the 1-2% range by the end of 2024.

Construction Labor: Job Openings

In July 2024, open construction jobs continued to decline, reflecting a broader slowdown in home construction due to elevated interest rates. The number of open jobs in the construction sector dropped from 299,000 in June to 248,000 in July, down significantly from 351,000 a year ago¹⁷. This decline aligns with a general cooling in the labor market, which is considered a positive indicator for inflation and future interest rate cuts. Additionally, the overall job openings for the economy fell to 7.67 million, below the 8 million thresholds needed to ease inflation concerns¹⁷. Despite this, the skilled labor shortage in the construction industry is expected to persist, with demand likely to rise as the Federal Reserve has begun easing monetary policy.

Source: Eye on Housing

MARKETS AND COMPETITION

While Toll Brothers has found success within the luxury homebuilding space, we used 4 competitor homebuilders for our relative valuation model. These companies include

Taylor Morrison Home (TMHC), KB Home (KBH), Meritage Home (MTH), and PulteGroup (PHM).

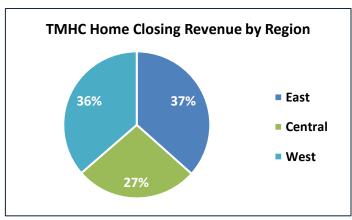

Company	Rev	NI	Debt	Mkt Cap
THMC	\$7,418	\$769	\$2,150	\$7,586
TOL	\$9,995	\$1,372	\$2,822	\$16,669
KBH	\$6,381	\$590	\$1,691	\$6,465
MTH	\$6,113	\$739	\$1,313	\$7,537
PHM	\$16,062	\$2,602	\$2,174	\$31,177

Source: FactSet

Taylor Morrison Home (TMHC)

Taylor Morrison is one of the leading U.S. homebuilders known for constructing a variety of homes, anywhere from entry-level to luxury. The company also developing master-planned communities with amenities like parks and pools. In 2007, the company was formed through the merger of Taylor Woodrow and Morrison Homes. The company operates in key housing markets such as Arizona, Texas, California, Florida, and Colorado. It emphasizes energy efficiency and sustainable building practices, with modern layouts and environmentally friendly materials. Through its subsidiary, Taylor Morrison Home Funding, it also offers mortgage services to streamline the homebuying process.

A geographical revenue breakdown for TMHC's home closing operations in FY23, which totaled \$7.2B, is shown below:

Source: TMHC 10-K 2023

KB Home (KBH)

KB Home is a large U.S. homebuilder known for offering customizable homes through its "Built to Order" approach.

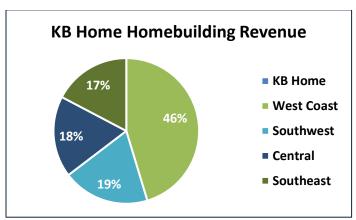

^{*}All figures shown in millions

This allows buyers to personalize floor plans, fixtures, and finishes. KBH was founded in 1957 and is based in Los Angeles. The company operates in key markets such as California, Texas, Florida, and Arizona, focusing on affordability for first-time and move-up buyers. KB Home also emphasizes sustainability, incorporating energy-efficient features to reduce utility costs. With flexible financing options and a reputation for quality and customer service, the company is recognized for its innovation in homebuilding.

A geographical revenue breakdown for KBH's homebuilding operations in FY23, which totaled \$5.3B, is shown below:

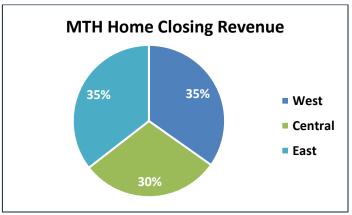

Source: KBH 10-K 2023

Meritage Homes (MTH)

Meritage Homes is a U.S. homebuilder, founded in 1985 and based in Scottsdale, Arizona. MTH is known for its focus on energy-efficient and environmentally friendly construction. The company integrates advanced energy-saving technologies, such as spray-foam insulation and ENERGY STAR certified appliances, into its home designs. Meritage operates in high-demand housing markets, including Arizona, Texas, California, and Florida, offering a range of homes that cater to both first-time buyers and move-up buyers. Known for its modern layouts and competitive pricing, Meritage combines affordability with

sustainability, making it a popular choice for eco-conscious homebuyers.

A geographical revenue breakdown for MTH's home closing segment in FY23, which totaled \$6B, is shown below:

Source: MTH 10-K 2023

PulteGroup (PHM)

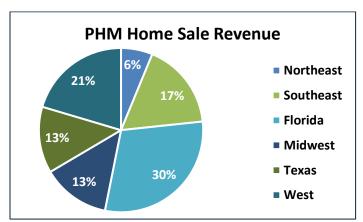

PulteGroup is another one of the largest U.S. homebuilders, founded in 1950 and headquartered in Atlanta, Georgia. It operates under several brands, including Pulte Homes, Centex, Del Webb, and John Wieland Homes. The company offers a wide range of homes for different buyers—from first-time homeowners to luxury buyers and retirees. The company builds homes in over 40 major housing markets, focusing on high-demand areas like Florida, Texas, and California. PHM is

known for its innovation and quality, and delivers modern, durable homes.

A geographical revenue breakdown for PHM's home sale operations in FY23, which totaled \$15.6B, is shown below:

Source: PHM 10-K 2023

Metric Peer Comparison

Profitability

Company	EBIT Margin	Net Margin
THMC	14.62%	10.37%
TOL	17.82%	13.73%
КВН	11.76%	9.14%
MTH	14.71%	12.04%
PHM	21.15%	16.14%

Source: FactSet

PHM has historically been able to manage costs and maintain a higher profitability than its peer group. TOL has seen its margins expand significantly though over the past 3 years. In 2020 TOL's EBIT and net margins were just 8.67% and 6.31%. These figures have increased for TOL each year and it will be key to monitor if they can sustain this level of margin expansion in its FY24 annual earnings report.

Units delivered & Average Price per Unit

Company	UD	APpU
THMC	11,495	\$623,000
TOL	9,597	\$1,028,000
KBH	13,236	\$403,939
MTH	13,976	\$433,400
PHM	28,603	\$545,000

Source: FactSet

*UD: Units Delivered, APpU: Average Price per Unit

The peer group is pretty consistent in terms of gross homes delivered in FY23 with PHM being an outlier due to its group of varying homebuilding brands. TOL is notably higher than its peers in terms of average price per unit due to its focus on luxury homes. TOL's total revenue slightly offset compared to its peers as it only delivered 9,597 homes in FY23.

Backlog

Company	Backlog Homes	Value (\$M)
THMC	5,289	\$3,644
TOL	6,578	\$6,945
KBH	5,510	\$2,668
MTH	2,549	\$1,088
PHM	12,146	\$7,320

Source: FactSet

Considering PHM is made up of a conglomerate of brands, the large increase in gross homes and home value in backlog compared to its peers makes sense. TOL's backlog however seems to be the highest quality amongst the peer group while having plenty of volume at 6,578 homes in backlog with an average selling price of \$1,055,000. That figure is nearly double its peers due to its focus on luxury homebuilding. It is however worth noting that TOL typically takes longer to close its homes due to the level of customization and design features it delivers to its clients.

Trading Multiples

Company	P/E 24E	P/E 25E	P/BV
THMC	8.4	7.6	1.5
TOL	10.8	10.8	2.4
KBH	9.6	8.7	1.7
MTH	9.3	8.9	1.6
PHM	10.4	10.2	2.9

Source: FactSet

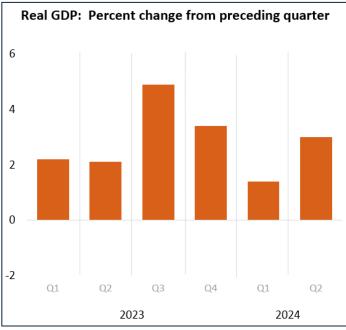

TOL seems to be trading at a premium relative to its peers with PHM trading at a similar multiple. PHM owning multiple brands with the ability to offer the widest variety of homes to consumers allows it to trade at a premium compared to its peers. TOL on the other hand, benefits from its exponential growth over the past 3 years and we believe it has now become slightly overvalued compared to its peers.

ECONOMIC OUTLOOK

Real GDP Growth

The U.S. saw real GDP grow by 1.4% and 3.0% in Q1 and Q2 of 2024 respectively so far. Looking forward, the Conference Board has continued to increase their outlook for 2024 up to 2.4%. The graph below depicts Real GDP growth Q/Q from the start of 2023 to Q2 of 2024:

Source: U.S. Bureau of Economic Analysis

The boards increased outlook on real GDP growth positively impacts the homebuilding industry by boosting consumer confidence and demand for homes. As the economy continues to grow, people feel more secure in their jobs and finances, leading to higher home purchases. Rising incomes and employment further enhance this, allowing more families to afford homes, which increases demand for new construction which is highly beneficial for TOL. It also allows for more favorable credit conditions and easier access to mortgages for consumers. Additionally, government investment in infrastructure during growth periods improves areas where new homes are built, making the surrounding areas of TOL's new developments more attractive to consumers. Long term however, we forecast real GDP to slow to 2.5% in 2 years which would reduce consumer spending especially for luxury homes.

Interest Rates and Inflation

The Federal Reserve Committee announced on September 18, 2024, that they came to the decision to reduce the target range for the federal funds rate from 5.25-5.50% by 50 basis points (bps) to 4.75-5.00%. This decision was made as the committee expressed an increased confidence that inflation was trending toward their 2% target.

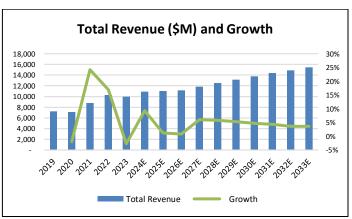

Source: FRED

A cut in the federal funds rate has historically positively impacted the homebuilding industry by lowering borrowing costs, particularly through reduced mortgage rates. As mortgage rates drop, home loans become more affordable, leading to increased housing affordability and encouraging more people, especially first-time buyers, to enter the market. This higher demand for homes drives new construction, as builders are also able to finance projects at lower costs. Additionally, a rate cut can boost consumer confidence, prompting more people to make large purchases like homes. We are projecting another 25 bps rate cut at the Fed's November meeting which would further help the homebuilding industry's performance.

VALUATION

Revenue Growth

Source: FactSet and HF Estimates

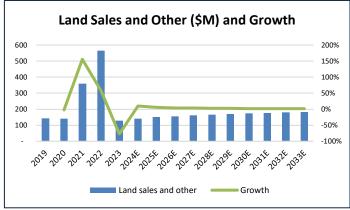

TOL breaks down its home sales segment by US region. Since the company recognizes revenue when a finalized unit is delivered or sold, we projected our revenue in each region by growing units delivered. We also factor in the average price of unit delivered which reached an all-time high at \$1,028,000 in FY23. We broke this out by region to ensure we are factoring in different prices of homes in different regions. We project the average price of a home to regress in FY24-FY26 at a -3% CAGR. For FY24, we project steady unit delivery growth across all regions by 13%. This gives us a total home sales revenue of \$11B which is 5.8% above consensus estimates. We expect a regression in both units delivered and average price of units delivered in 2025 and 2026. We project units delivered will reach a sustainable growth rate in each region of 3.5-5% before tailoring off to 1.5-2% in FY33. This is largely attributed to our belief that consumer budgets will constrict over the next 2 years making luxury homes less affordable and increase in construction materials.

Source: FactSet and HF Estimates

TOL provides little detail relating to the specifics of its land sales and other segment making it difficult to project. For this reason, we projected land revenue in line with consensus estimates. We expect land revenue to remain a low % of total revenue and generate minimal profit. This makes our model less sensitive to our land revenue projections.

Source: FactSet and HF Estimates

Operating Expenses

Toll Brothers has 3 main operating expenses:

- Cost of home sales
- Cost of land sales and other
- SG&A

Toll Brothers has shown steady improvement in its ability to reduce cost of home sales in relation to home sales revenue. Its home sales cost was taking up 80% of home sales revenue in 2019 compared to just 73% in 2023. Looking ahead, we anticipate a slight increase back to 73.2% through 2026, as pricing power decreases and material costs rebound. However, we project home sales costs will improve to just 72% through the forecasted period.

We forecast the land sales margin to remain consistent with its five-year historical average of 96.6% as the company states it does not expect to generate much profit from this segment. Additionally, we project TOL's SG&A expenses, which are closely tied to total revenue, will remain at the five-year average of 9.7%.

WACC Assumptions

We calculated TOL's weighted average cost of capital (WACC) at 9.51%, which is slightly higher than consensus estimates. This can be largely attributed to the Henry Fund equity risk premium being higher than consensus estimates. The 2-year weekly Beta derived from

Bloomberg also is higher than consensus estimates as well. For this calculation, we used the following assumptions:

Risk-Free Rate: We used 4.03%, which is the 10-year US Treasury bond yield as of October 15, 2024

Beta: We used 1.28, which is the 2-year weekly raw beta from Bloomberg.

Equity Risk Premium: We used the Henry Fund consensus estimate of 5%.

Pre-Tax Cost of Debt: We used 5.49%, which is FactSet's estimate based on the bond securities TOL has issued.

Tax Rate: We used 21% for our forecast horizon, equal to the implied marginal tax rate of FY 2023.

Using these variables, we calculated Toll Brothers' cost of equity at 10.42% and after-tax cost of debt at 4.34%.

DCF Valuation

We started with Discounted Cash Flow (DCF) and Economic Profit (EP) models for our valuation. Our analysis showed an intrinsic value of \$160.54. The key assumptions we used for both models included a continuous return on invested capital (ROIC) of 16.26% and a continuous NOPLAT growth of 2.5%. We believe these models most accurately depict Toll Brothers' valuation due to its strong ability to generate free cash flow. The models consider revenue projections relying on factors such as units delivered, average price per unit delivered, geographical location. We feel confident TOL can achieve both our revenue projections and maintain its margins over the forecasted period.

DDM Valuation

Our dividend discount model (DDM) indicates an implied price of \$147.33, providing a baseline for Toll Brothers' stock price based on its dividend payments. TOL has never paid much of a dividend but have increased it by 23.56% CAGR since 2020. This largely was due to the company's earnings growing at a 53.76% CAGR. As growth in earnings slows, we expect dividends to slow as well forecasting largely in line with consensus estimates until 2026 and slowly increase to \$1.81 in 2033. Due to the company's

small dividend paid, we believe this model slightly undervalues Toll Brothers.

Relative Valuation

In our relative valuation analysis, we examined TOL's primary competitors in the homebuilding industry:

- Taylor Morrison Home (TMHC)
- KB Home (KBH)
- Meritage Homes (MTH)
- PulteGroup (PHM)

Our relative P/E models suggest implied prices of \$138.33 and \$130.28 based on projected EPS for 2024 and 2025. This is an indication that TOL may be overvalued relative to its peers considering its trading at \$148.02. Similarly, our relative P/B model indicated an implied price of \$125.22. Toll Brothers seems to be trading at a premium compared to its peers due to its recent spike in earnings growth. While our DCF model was the primary driver of our target price, it is worth noting we could see a price regression in line with its peers multiple if TOL's EPS growth slows.

KEYS TO MONITOR

Toll Brothers Revenue Metrics

The following metrics relating to TOL will be vital to the company's success and require monitorization:

- Units Delivered
- Average Price per Unit
- Homes in Backlog

While we foresee units delivered continuing to drive revenue growth for TOL, if home prices for the company remain elevated, we could see unprecedented revenue growth from the company which would increase our target price. We also want to monitor the company's homes in backlog because these are contracts that the company is expected to deliver on. If backlog homes were to decrease, it could signal future financial performance and decrease our outlook on TOL.

Economic Metrics

The main economic metrics we will continue to monitor are:

- Real GDP Growth
- Federal Funds Rate
- Inflation
- Job Openings in the Construction Labor Market
- Producer Price Index for Construction Materials

As we expect real GDP to continue growing through the end of 2024, we hope to see TOL perform well on its annual earnings report for FY24. We will need to monitor inflation, job openings, and construction material costs to ensure TOL is able to maintain its margins while delivering high end homes to consumers. We also need to monitor the health of consumers budgets due to TOL's high end client base. In the event that real GDP growth slows, we could see consumers opt for a cheaper alternative to build homes over the next few years.
