| • Compared to the sector average occupancy rate of 94.5%, Prologis' ability | Market Cap (B) | |
| to achieve occupancy rates of 98.0% will continue to drive revenue growth | Shares Outstanding (M) | |
| at a CAGR of 12.6% through the projection period ₅ . | Institutional Ownership | |

- Prologis' integration of Duke Realty and capital expenditures support square footage growth in the U.S. at a CAGR of 9.9% through the projected period.
- Continued expansion of strategic capital funds throughout Europe, Asia, Mexico, and Brazil will allow Prologis to tap into emerging markets. Emerging market opportunities support international growth of square footage at a CAGR of 6.8% over the projection period.

Risks to Thesis

-50%

Т

F

М

- Since the COIVD-19 pandemic, e-commerce growth has declined by 25.3%, which could drop occupancy rates lower than guidance, decrease the demand for logistics facilities, and halt Prologis' expansion of their real estate portfolio.
- With a 35% chance of recession and the Fed battling inflation with rate hikes through the first half of 2023, this could drive consumer spending lower and diminish Prologis' expansion of their international portfolio [12].

Stock Rating

Prologis is a global leader in logistics real estate with a focus on high-barrier, high-growth markets. As of September 2022, the company had owned or had investments in, wholly owned or through co-investment ventures, a total of 1.2 billion square feet of real estate in 19 countries. These assets serve a total of 6,600 customers across two major categories: business-to-business fulfillment and consumer fulfillment.

Important disclosures appear on the last page of this report.

COMPANY DESCRIPTION

Prologis, Inc. operates as an industrial Real Estate Investment Trust (REIT) headquartered in San Francisco, California. The company is focused on serving logistic needs and supporting the expansion of e-commerce through warehouses scattered across North America, Europe, Asia, and other emerging markets. In 2022, Prologis reported 5,495 buildings and a total of 1.2 billion square feet.

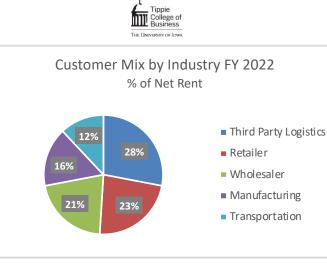

Source: Prologis Q4 2022 Supplemental [1]

The company has over 6,600 customers consisting of logistics companies, e-commerce businesses, and courier service companies. The company has some degree of customer concentration as the top 25 customers represent 20.5% of their total revenue. The chart below shows the top 10 customers and their respective share of revenue.

| Top 10 Customers | % of Net Rent |
|------------------|---------------|
| Amazon | 5.3% |
| Home Depot | 1.7% |
| FedEx | 1.3% |
| Geodis | 1.3% |
| DHL | 1.1% |
| CEVA Logistics | 0.9% |
| UPS | 0.8% |
| GXO | 0.7% |
| DSV Panalpina | 0.7% |
| Maersk | 0.6% |
| Total | 14.4% |

Source: Prologis Q4 2022 Supplemental [1]

Prologis has higher customer concentration due to the size of their tenants' logistics operations, but the company is diversified in terms of the industries they supply. Many of Prologis' peers have less customer concentration due to their relative size compared to Prologis.

Source: Prologis Q4 2022 Supplemental [1]

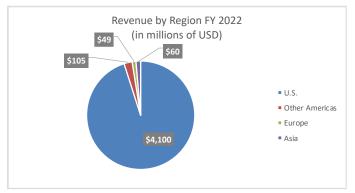

Prologis generates most of their revenue from two main segments: Real Estate Operations and Strategic Capital. The company generates most of their revenue in their real estate operations segment. This revenue comes from collecting rent from customers through operating leases. Through the Real Estate Operations segment, the company develops also and acquires real estate

Prologis' strategic capital segment represents the management of unconsolidated co-investment ventures and partnerships with third parties. This is accomplished through nine private, open, and closed-end investment funds consisting of \$92 billion in assets under management, 584 million square feet, 2,695 buildings in 17 countries. Through this segment, Prologis also provides leasing, acquisition, construction, development, and financing services.

Real Estate Operations

In 2022, Prologis' Real Estate Operations segment accounted for 82.2% of their total revenue. Over the past five years, Prologis has deployed over \$15.7 billion toward development and \$9.9 billion toward land. They have also acquired the second largest industrial REIT, Duke Realty Corporation for \$23.2 billion in Q4 of 2022. This segment generates most of its revenue in the U.S. and their American portfolio accounts for 86.0% of the net operating income alone. The following chart shows the geographic breakdown of the company's real estate operations and their respective revenues.

Source: Prologis Q4 2022 Supplemental [1]

Prologis' real estate operations are dominated by U.S. facilities; however, the company has initiated development of over 17.8 million square feet of warehousing space outside the U.S. in 2022. This will enable the company's international real estate operations to grow at a CGAR of 9.7% through the projection period. Prologis' international presence is considerably small compared to their U.S. portfolio, but the company is well-positioned among competitors that have little to no real estate internationally.

Prologis has a variety of logistics warehousing solutions that help accomplish logistical needs of tenants based on location, accessibility, and purpose.

Through gateway, multi-market, city, and Last Touch distribution centers, Prologis' services aim to reach a wide set of consumers efficiently.

- 1. Gateway multi-market facilities with access to major sea and intermodal ports.
- Multi-Market larger warehouses located on the outer edge of major urban areas near key transportation hubs.
- City distribution small to mid-sized warehouses positioned to provide one to two-day shipping to a large market of consumers.
- Last Touch properties aimed to reach large, dense populations within hours to provide faster, efficient delivery from e-commerce providers.

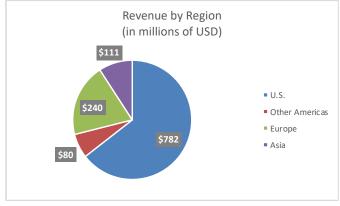

Prologis' wide variety of warehousing and distribution facilities brings the product closer to the consumer. The

key to capturing their customers is strategic positioning and enabling their customers to deliver innovation.

Strategic Capital Segment

The strategic capital segment is an essential element of Prologis' operations. This segment enables Prologis to tap into institutional and private equity capital. Their revenues in this segment are generated through managing third party properties owned through joint ventures or partnerships. At the end of 2022, the company's strategic capital segment has over \$62 billion in third-party assets under management and \$92 billion of total assets under management. The company's three main funds include their Prologis Targeted U.S. Logistics Fund, Prologis European Logistics Fund, and Prologis China Core Logistics Fund. The largest of these funds is currently their Prologis European fund with 160.9 million square feet with a book value of \$17.4 billion of operating buildings. The chart below shows the geographic breakdown of Prologis' Strategic Capital Segment.

Source: Prologis Q4 2022 Supplemental [1]

This segment is more internationally focused than their real estate operations with only 64.5% of their revenue coming from real estate operations. Prologis is able to diversity their U.S. investments through enhanced access to foreign markets through a variety of funds in China, Japan, Europe, Mexico, and Brazil.

Cost Structure Analysis

Prologis' income statement includes revenues from real estate operations and strategic capital ventures and the

respective operating costs of each segment. Over the past five years, rental expenses have accounted for a total of 25.2% of the rental revenue and strategic capital expenses have been 34.9% of strategic capital revenue. The company generates a higher margin on their real estate operations, but the strategic capital segment is essential to diversification and capturing additional capital and opportunities.

General and administrative costs have been significantly reduced over the past 10 years from 12.7% to 5.5% of their total revenue. In their recent earnings call on January 18, 2023, the CFO stated that G&A will likely increase substantially in the next fiscal year due to increased wages and inflation costs. The chart below shows the amount of revenue generated from each segment and the respective costs associated with each line of business.

Debt Maturity Analysis

Over the past five years, Prologis maintained an average debt-to-equity ratio 45.0%. Debt capital markets have been challenging for many issuers; however, Prologis successfully executed numerous transactions in 2022. Notably, the company has secured over \$1.1 billion in funding at an interest rate below 3.0%. This is mainly attributable to the company's strong liquidity state with over \$4.2 billion in liquid assets and \$20.0 billion in borrowing capacity from open-ended funds (Q4 Earnings). With a strong balance sheet, the company has an A credit rating (Moody's). The acquisition of Duke Realty has significantly expanded the company's balance sheet and enhanced the company upcoming debt maturities.

| Maturity | Total Debt | Wtd. Avg. Interest Rate | % Fixed |
|----------|-----------------|-------------------------|---------|
| 2023 | \$32.9 million | 3.3% | 88% |
| 2024 | \$415.4 million | 1.1% | 61% |
| 2025 | \$1.2 billion | 3.7% | 15% |
| 2026 | \$2.0 billion | 2.3% | 65% |
| 2027 | \$3.1 billion | 3.3% | 59% |

Source: Prologis Q4 2022 Supplemental [1]

Given the company's strong balance sheet, access to capital, and liquidity position, Prologis is capable of meeting their debt obligations in 2023 onward. Over the

past five years, the company has an average interest coverage ratio of 8.2. Their ability to borrow at low and fixed rates ensures the company is well positioned to meet obligations. Over the forecasted period, Prologis' cash from operating activities grows at a CAGR of 14.7%, which implies the company will be in a strong position to meet the payments on their debt obligations through 2030.

ESG Analysis

Prologis' Environmental, Social, and Governance risk is negligible, according to Morningstar's Sustainalytics. Prologis ranks very well among comparable REITs.

| Company | ESG Risk Rating | Industry Rank | | |
|----------------------|-----------------|---------------|-----------------|--|
| Prologis, Inc. | 8.4 | Negligible | 22 out of 1040 | |
| Crown Castle, Inc. | 9.9 | Negligible | 63 out of 1040 | |
| American Tower Corp. | 10.9 | Low | 95 out of 1040 | |
| Equinix, Inc. | 11.3 | Low | 110 out of 1040 | |
| Public Storage | 13.1 | Low | 197 out of 1040 | |

Source: Sustainalytics [9]

In a recent ESG Roadshow, Prologis highlighted their commitment to ESG. The company has been carbon neutral since 2019 and implements energy efficient innovations in each development, subsequently lowering costs. The company also has roughly 405 MW of solar generating capacity, higher than some utility companies [1]. 311 out of the 6,600 buildings have solar capabilities[1].

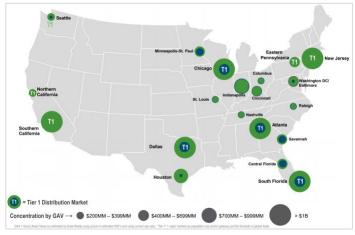

The company has also reduced scope 1, 2, and 3 emissions from 2017. Scope 3 emissions include the direct emissions from Prologis operations, scope 2 is indirect emissions from the use of electricity, and scope 3 is other indirect emissions from energy consumption of Prologis customers. Scope 1 and 2 emissions have declined by 1% from 2017 to 2021; however, scope 3 emissions have been reduced by 38.0% driven by building efficiency [9].

RECENT DEVELOPMENTS

Acquisition of Duke Realty – October 2022

In the fourth quarter of 2022, Prologis acquired the second largest industrial REIT, Duke Realty Corporation (DRE). The company was acquired for \$25.1 billion in an all-stock deal at an EV/EBITDA multiple of 34.9 (Reuters). The acquisition brought more than 500 new customers in key markets, 142 million square feet of fully operational logistics buildings in 19 major U.S. markets, 7 million square feet under development, and approximately 17 million square feet of developable land. The acquisition expands Prologis' presence in the U.S. and adds value to the Essentials platform for Prologis. The Essentials platform is built to address supply chain issues. The chart below shows the real estate acquired through the transaction.

Source: Seeking Alpha [10]

At the time of the acquisition, Duke's market cap was \$18.7 billion making it the second largest logistics warehousing REIT in the U.S. The acquisition of Duke Realty Corporation strategically expands the company's presence in key urban areas further supporting greater efficiency and economies of scale.

We think that the acquisition of Duke Realty will be an integrative transaction that will augment Prologis' current real estate portfolio. Duke Realty's extensive portfolio of tier 1 properties in coastal locations will expand Prologis' presence in the market. Duke Realty also has less customer concentration which will introduce new customers in new

industries to Prologis' current portfolio of concentrated tenants.

Fourth Quarter Earnings Report

On January 18, 2023, the company reported Q4 earnings and offered hopeful guidance for 2023 and beyond. Prologis surprised investor with EPS of \$0.63, beating expectation by 3.7% ^[5]. The company also issued guidance for 2023 estimating EPS to be from \$3.00 to \$3.15 and FFO per share to be anywhere from \$5.40 to \$5.60. Prologis also plans to continue increasing capital expenditures in 2023 despite a record setting year of over \$25 billion, including their acquisition of Duke Realty Corporation. We forecast that capex will not be as aggressive as planned despite the company's ability to secure low-cost, fixed rate debt in a challenging climate.

The company also offered guidance on strategic capital revenue and general and administrative expenses. The company forecasts to earn \$880 million on the low end to \$905 million on the upper end through their strategic capital segment. They expect to experience higher wages and corporate expenses, hence general and administrative expenses are forecasted to be from \$370 million to \$385 million. These expectations were implemented into the valuation

INDUSTRY OVERVIEW

The Industrial Real Estate Investment Trust (REIT) industry is a sector that invests in income-generating industrial properties such as warehouses, distribution centers, and manufacturing facilities. These REITs own and manage industrial properties and generate revenue through rental income. The industry plays a crucial role in the real estate market, providing investors with a way to invest in industrial real estate assets without the need for direct property ownership. The demand for industrial real estate has increased in recent years due to the growth of ecommerce and the need for modern warehousing and distribution facilities. The industry is subject to several market factors including economic growth, changes in

consumer behavior, interest rates, and demand for warehousing space.

A few important metrics for REITs include capitalization rates and occupancy rates.

Capitalization Rates

Cap rates, also known as capitalization rates, are an important measure of the performance and value of industrial real estate investment trusts. Cap rates are calculated as the ratio of a property's net operating income (NOI) to its market value or purchase price.

For industrial REITs, cap rates are an important factor in determining the value of their properties and their overall portfolio. They provide a measure of the return that can be expected on a property based on its income-generating potential. Higher cap rates generally indicate a lower value or lower expected returns, while lower cap rates suggest a higher value or higher expected returns.

In addition, cap rates play a significant role in the investment decisions of industrial REITs. When evaluating potential acquisitions or development projects, industrial REITs will often consider the expected cap rate of the property. Cap rates in the current market are on the rise, as they typically risk with interest rates and inflation. This poses a risk for companies evaluating investment opportunities as the expected cap rate may seem inflated.

Cap rates are a critical measure of the value and performance of industrial REITs, playing a crucial role in investment decisions, and asset pricing.

Occupancy Rates

Occupancy rates are a key metric for REITs that measure the amount of space that is being occupied by tenants. Despite market tightness, Prologis has ended the year with an occupancy rate of 98.2%, above the industry average of 94.5% [4]. Prologis' elevated occupancy rate is partly driven by their acquisition of Duke Realty Corporation, which brought an additional 500 customers to the company. Per their Q4 earnings call, the company states that the

acquisition of Duke only added 30-40 basis point to their overall occupancy. Prologis has a shown a strong history of high occupancy with a five-year historical average of 96.8%. The company expects occupancy to drop slightly in 2023 to a low of 96.5% to a high of 97.5%.

Occupancy rates also provide important information about market trends and the broader economy. A decline in occupancy rates in a particular market may indicate a slowdown in economic activity or a shift in demand towards other warehousing solutions. Conversely, an increase in occupancy rates may indicate a growing demand for industrial real estate and a stronger economy.

Occupancy rates are a critical measure of the performance and demand for industrial REITs, playing a crucial role in revenue projections and investment decisions.

Urban Locations

Access to real estate in key locations connects both cap rates and occupancy rates. As e-commerce platforms and courier services increasingly aim to deliver in the shortest period possible, access to densely populated areas is imperative.

The location of warehouses is an imperative key to success for industrial real estate investment trusts (REITs) because it directly affects their cap rate and occupancy. The location of a warehouse affects its accessibility and its ability to serve its target market. In turn, this drives higher rental income and demand.

A warehouse located in a prime location, close to major transportation hubs and urban centers, is more appealing to industrial REIT customers. This is because it can serve a larger market of tenants and provide convenient access to transportation and distribution networks. These factors increase the demand for the property driving higher NOI and thus cap rate. There has been a shift toward urban industrial developments as many logistics companies have promised customers the fastest possible turnaround from the moment of placing an order.

In summary, the location of warehouses is an important factor in the success of industrial REITs because it affects their cap rate and occupancy. By selecting prime locations, industrial REITs can increase their rental income and demand for their properties which further drives growth in an innovative market.

COMPETITION

Sources: References [1, 15, 16, 17 & 18]

Big Players

There are few large players in the industrial REIT industry. The largest player is Prologis, by a wide margin. Many of the competitors in the industry have operations focused largely on U.S. real estate; however, Prologis has established real estate operations and strategic capital funds in foreign countries. This entails significant risk for the company such as foreign exchange risk and political risk.

| Name | Market | Cap (\$B) | Rev | enue (\$M) | Gross Margin | Net Margin |
|------------------|--------|-----------|-----|------------|--------------|------------|
| Prologis | \$ | 122,459 | \$ | 5,974 | 44.4% | 56.3% |
| Rexford | \$ | 11,815 | \$ | 453 | 42.8% | 28.2% |
| EastGroup | \$ | 7,478 | \$ | 409 | 40.8% | 38.5% |
| First Industrial | \$ | 7,096 | \$ | 476 | 44.9% | 56.8% |
| Terreno | \$ | 4,975 | \$ | 222 | 51.8% | 39.2% |

Source: FactSet [5]

The chart shows that Prologis is the main player in the industrial REIT industry with over 6,600 customers and 782 million square feet in the U.S. alone.

| Name | Revenue | Buildings | Square Feet (M) | Revenue per Sq. |
|------------------|-------------|-----------|-----------------|-----------------|
| Prologis | \$ 5,974 | 5,495 | 1,200.0 | \$ 4.9 |
| Rexford | \$ 453 | 357 | 42.5 | \$ 10.6 |
| EastGroup | \$ 409 | 248 | 56.0 | \$ 7.3 |
| First Industrial | \$ 476 | 421 | 64.8 | \$ 7.3 |
| Terreno | \$ 222 | 252 | 15.4 | \$ 14.4 |

Source: FactSet [5]

The nearest competitor, Rexford Industrial Realty, falls short in terms of revenue, market capitalization, and square feet, but the company captures a higher revenue per square foot of industrial space. Prologis falls short in terms of revenue per square foot because of the size of their real international real estate operations. When decomposing revenue, it becomes clear that Prologis can generate higher revenue per square foot in the U.S. than any other location by an average of 68%, but the diversification benefits and access to emerging markets creates enhanced opportunities for the company.

Their exposure to international real estate creates an economic moat for the company because if the U.S. industrial real estate market performs poorly, Prologis is safeguarded by unconsolidated, co-investment ventures in foreign countries. Although the U.S. market has shown strength with higher occupancy rates by more than 75 basis points compared to the portfolio, sole exposure to the U.S. market entails greater risk than the international operations of Prologis.

Threat of Entry – MEDIUM

As large logistics company aim to be closer to the customer and promising one- to two-day shipping, the threat of entry has risen. These large customers need warehousing space in downtown, urban, and metropolitan areas, and these properties come at a cost for developers.

Prior to the paradigm shift, many warehouses located outside central locations were common; hence, the barriers to entry were relatively low. Land outside urban areas is plentiful and less stringent upon zoning restrictions. With higher barriers to entry, the existing

players in the industry are relatively safeguarded as customer efficiency has become key.

Power of Buyers – LOW

Buyers of industrial warehousing space are relatively price insensitive as rental costs are a very low portion of those company's overall logistics costs. As per S&P Global, these costs range from 5% - 10% of a given company's total logistics costs. Buyers of warehousing space prioritize price locations over the costs of warehousing [4].

PEER COMPARISONS

Rexford Industrial Realty: -0.4% YTD

Rexford Industrial Realty (REXR) is a self-administered and self-managed real estate investment trust. It engages in owning and operating industrial properties in infill markets. The company was founded in 2013 and headquartered in Los Angeles, CA. Most of its properties are concentrated in Southern California, one of the strongest and largest industrial market in the nation. Their portfolio consists of 42.5 million square feet of owned industrial space all located in the Southern California Area_[15]. For FY 2022, the company experienced average occupancy of 98.7% and a cap rate of 6.4% across their portfolio_[15]. Compared to all the peer comparisons in the industrial REIT group, Rexford's portfolio of tenants is diverse as they serve large industries such as warehousing transportation to construction and and mining companies₁₅. The following chart shows the companies concentration of tenants.

| Industry | % of Net Rent |
|------------------------------|---------------|
| Warehousing / Transportation | 23% |
| Wholesale Trade | 22% |
| Manufacturing | 20% |
| Tech Services | 8% |
| Retail Trade | 7% |
| Other | 20% |

Source: Rexford 2023 Investor Presentation [15]

In FY 2022, Rexford's 2022 market rent growth was roughly 10.0% and the company has a weighted average

remaining lease term of 4 years₁₅. A shorter lease term gives the company more room to increase rental income as previous leases expire.

EastGroup Properties: +9.2% YTD

EastGroup Properties, Inc. (EGP) is an internally managed industrial REIT which engages in the development, acquisition, and operation of industrial properties₅. The company's roots in industrial properties began in 1969 long before many other peer comparisons. The company's portfolio of properties includes 43.3 million square feet of industrial property that is currently leases at an average occupancy of 98.2% for the twelve months ending December 2022_[16]. Their portfolio has a weighted average lease term of 4.4 years, and their same store rent growth was 8.9%_[16]. The chart below shows EastGroup's portfolio of industrial space across the U.S.

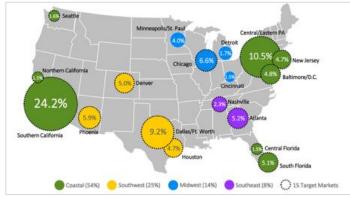

Source: EastGroup Properties Q4 2022 Supplement_[16]

First Industrial Realty: +5.8% YTD

First Industrial Realty Trust, Inc. (FR) engages in the ownership, management, acquisition, sale, development, and redevelopment of industrial real estate₅. The company's portfolio includes bulk warehouses, regional warehouses, research and development spaces, and light industrial properties. FR's portfolio consists of 62.9 million square feet of industrial space scattered across large markets in the U.S. as evidenced by the chart below.

Source: First Industrial Realty Presentation_[17]

The chart above depicts the cities and their respective share of net rental income, with Southern California generating the most net rental income. In FY 2022, the company experienced an average occupancy of 98.8% and 9.6% growth in same-store net operating income₁₇. As of September 2022, the company had 15 new developments under construction and expects to add 3.7 million in square feet before the end of 2023_[17].

Terreno Realty Corporation: +9.2% YTD

Terreno Realty Corporation (TRNO) is a real estate company which acquires, owns, and manages industrial realty properties across the U.S. The company invests in several types of industrial real estate including warehouses, distribution centers, flex spaces, and research and development spaces₅. The company is the smaller in term of square footage as their portfolio contains a total of 15.3 million square feet and 252 buildings_[18]. The map below shows their portfolio across the U.S. and the share of net rent that each city generates.

Source: Terreno Realty Corporation Q1 2023 Earnings Supplemental [18]

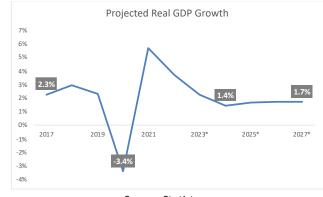

In FY 2022, the company achieved 10.6% same-store NOI growth and an average occupancy of 98.7% for the year_[18].

ECONOMIC OUTLOOK

Generally, the industrial REIT market does well in times of economic growth and prosperity, but the industry has experienced elevated growth due to the expansion of ecommerce sales, which was fueled due to the global COVID-19 pandemic.

GDP Growth

Overall, the industrial REIT industry relies on gross domestic production because the amount of activity in and near major shipping ports. Being located near importing and exporting operations is key for Prologis. With international operations, Prologis is well-positioned to be more resistant to economic headwinds such as a decline in exports. The chart below shows the forecasted real GDP growth to 2027.

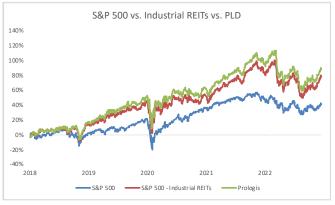

Source: Statista [7]

GDP growth took a downturn to -3.4% in 2022, along with the rest of the market. After a sharp recovery in 2021, GDP growth looks very dismal from 2022 onward. This is not a positive outlook for industrial REITs because the positioning of assets is focused near ports. In the past five years, exports have accounted for roughly 11.7% of the United States' GDP. The following chart shows the fiveyear historical performance of the S&P 500, S&P 500 – Industrial REITs Sub-Industry, and Prologis.

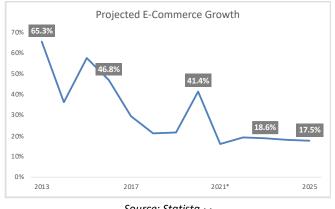

Source: Yahoo Finance [13]

From the chart, the industrial REIT sub-industry and Prologis were more resilient to the COVID-19 pandemic and recovered at a higher rate that the rest of market. Due to the pandemic, the growth in e-commerce soared which offset the negative overall impact of the global outbreak.

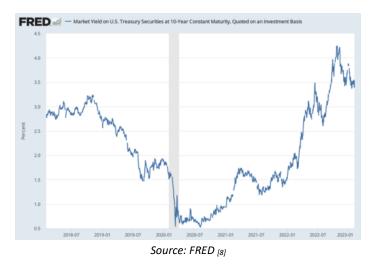

E-Commerce Growth

From the last chart, the boom in e-commerce enabled the industrial REIT industry to flourish during a time where market returns were rather dismal. The outlook on e-commerce growth is much slower following the COVID-19 pandemic, but it is still estimated to grow at elevated rates in the projection period. This will continue to enable the industry to experience above-average market returns.

Interest Rates

With the Federal Reserve aggressively fighting elevated inflation levels with rate hikes expected throughout 2023, this hinders the industrial REIT industry, especially Prologis. The forecasted revenue is primarily driven by the expected expansion of real estate square footage and strategic capital. With interest rates on the rise, capital deployment towards additional warehousing square footage will be constrained. Although the company has a strong balance sheet, the company will be unable to allocate funds at the same rate as they have in the past.

Availability of U.S. Warehouse Space

Source: CBRE [6]

The chart above depicts the decline in the availability of warehousing space in the U.S. Before experiencing rampant growth in e-commerce, the availability of warehouse space hovered above 8.0%. This correlates to

the overall demand for warehousing in the United States. As logistics square footage becomes less abundant, the industrial REIT industry will experience prosperity. This provides the opportunity for companies to continue to develop to meet the needs of the logistics market, but they are currently constrained by economic conditions. Once the Fed eases monetary policy by lowering interest rates, this could cause rampant growth in warehouse availability. Subsequently, this would cause occupancy rates to decline across the industry and force REITs to lower lease rates.

VALUATION

Revenue

Prologis' revenue was broken down by each segment: Real Estate Operations and Strategic Capital. The key assumptions in the real estate operations revenue projection were the growth in revenue per square foot and the growth in square footage. We projected that the company would continue to invest heavily in the U.S., but also assumed that the company would further leverage their growing presence in Europe and emerging markets with their real estate operations. The company also stated that market rent growth exceeded expectations throughout 2022 [4]. With this, it is forecasted that revenue will grow at a compound annual growth rate of 12.7%.

In the strategic capital segment, it is projected that revenue will grow at a CAGR of 12.9%. This high growth is primarily driven by Prologis' investments in international markets, increasing rental rates, and opportunities for above-average growth in emerging markets. The chart below shows the revenue over the projected period including real estate operations and strategic capital.

Cost and Margin Assumptions

The main operating expenses include rental, strategic, G&A, depreciation, and interest expense. Rental expenses have averaged 25.2% of rental revenue over the past five years and we forecasted 24.5% of rental revenue. This is driven by potential synergies from the acquisition of Duke Realty Corporation and Prologis' ability to reduce costs over the historical period.

Strategic capital expenses have varied drastically as a % of strategic capital revenue over the historical period. In 2022, strategic capital expenses were 29.2% of strategic capital revenue; however, this expense was forecasted at the five-year average of 34.9% of strategic capital revenue. This adjustment in the cost of strategic capital is driven by the company's pursuit of more international funds and higher required returns. General and administrative is expected to increase in the projection period due to inflationary pressures on wages and corporate costs. Hence, G&A is forecasted at 6.1% of total revenue compared to last year's 5.5% of total revenue.

Depreciation as a percentage of beginning net investments in real estate jumped 40 basis points, which is mainly attributable to the assets acquired through M&A and Duke Realty's assets. In 2022, net investments in real estate grew by 60.1%. As a result, depreciation in the forecasted period seem elevated. Along with the assets of Duke Realty, Prologis acquired the debt of the company. Coupled with rising interest rates and Prologis' floatingrate debt, interest expense jumped considerably in the projection period. With A-rated credit, a strong balance

sheet, and the ability to borrow at low rates, the elevated interest expense does not obstruct the company's performance considerably. The interest coverage rate floats between 6.8 and 10.2 within the projection period.

Capital Expenditures

Following a record-setting year with development starts of \$4.7 billion, stabilizations of \$2.9 billion, M&A of \$25.3 billion, and land acquisitions of \$3.3 billion, we forecast the company to reduce their capital expenditures significantly throughout the projection period from \$4.8 billion in 2023 to \$4.5 billion in the terminal year. Amid increased interest rates, the company has proven to continue to invest in real estate in the U.S. and internationally through low-cost debt and strong credit. Moving forward, we forecast that the company will be slightly constrained by the rising cost of debt. The company offered the following guidance for capital expenditures in 2023:

- Development stabilizations: \$2.6 billion to \$3.0 billion
- Development starts: 2.5 billion to \$\$3.0 billion
- Acquisitions: \$300 million to \$600 million

Despite the company's optimistic outlook on capital expenditures, we have forecasted lower capital expenditures over the projection period to maintain healthy cash flows.

Valuation Results

The discounted cash flow and economic profit model yielded a target price of \$145 per share. This is comparable to street estimates of \$142.35. With potential upside of 10.2% from the DCF price, this constitutes BUY rating for Prologis, Inc. This industry has shown some resistance during recessionary periods and despite current market conditions, the company has not slowed capital expenditures and has continued to invest in acquisitions and logistics facilities.

The dividend discount model has returned a price of \$130, which is below the street estimates and the current share price by 1.2%. This share price is driven by conservative

terminal growth of EPS at 3.0% and an elevated cost of equity stemming from an increase in the treasury yield.

Finally, the relative P/FFO model retuned a wide price target range of \$140 – \$160. This model included estimates for EPS and FFO per share for Rexford Industrial Realty, East Group Properties, First Industrial Realty Trust, and Terreno Realty Corporation. We found that P/FFO was most accurate in calculating a target share price because funds from operations drives value for REIT investors. The following chart shows a breakdown of the price targets derived from the relative valuation model.

| Ratio | Target Price | | | | | | | |
|-------------|--------------|--------|--|--|--|--|--|--|
| P/FFO 2022E | \$ | 139.23 | | | | | | |
| P/FFO 2023E | \$ | 147.82 | | | | | | |
| P/FFO 2024E | \$ | 158.69 | | | | | | |
| Average | \$ | 148.58 | | | | | | |

INVESTMENT POSITIVES

- We expect that Prologis will be able to continue to raise same store NOI from 9.0% to 9.75% while maintaining occupancy higher than 97.5%.
- The expected revenues from the acquisition of Duke Realty should contribute to a total of 27.3% revenue growth in 2023 alone.
- Continued strong growth in e-commerce will continue to drive the demand for industrial warehousing space through 2023, assuming the macroeconomic environment improves.

INVESTMENT NEGATIVES

- A sharp incline in supply will erode Prologis' pricing power in the market and will hinder their ability to raise rents 9.0% to 9.75% in 2023.
- A strong decline in the need for industrial space threatens Prologis' ability to maintain occupancy rates above 98%.
- A weak macroeconomic environment where disposable income and consumer confidence continue to decline will prompt less demand for

industrial warehousing space as economic activity slows down.

KEYS TO MONITOR

- Interest rates continue to rise and given the Federal Reserve's plans to hike rates through the first half of 2023, this could reduce e-commerce growth and threaten Prologis' costs of international expansion.
- It is hopeful that the Fed will begin to decrease rates in Q4 of 2023, which would enable Prologis to continue aggressive capital deployment domestically and internationally.
- There is a 65% chance the economy will avoid a recession, and in the event, we do, consumer spending and e-commerce growth will continue to fuel projected at a CAGR of 12.7%.
- If the U.S. falls into a recession, occupancy rates will drop below the company's guidance of 96.5%, causing the projected revenue CAGR to decrease by 2.8%.
