## JPMorgan Chase \& Co. (JPM)

Diversified Banks - Financial Services
Investment Thesis

We recommend a SELL rating on JP Morgan Chase \& Co. (JPM) with a target price range of $\$ 159-160$ with a projected loss of $14 \%$. JPM is coming off an unsustainable record year in 2023 leading investors to overvalue the stock.

## Drivers of Thesis

- Interest income ballooned to a staggering \$171B due to high interest rates on loans but we expect a decrease in demand for loans in the short term paired with potential rate cuts will result in interest income decreasing back to a standard level of around $\$ 120 \mathrm{~B}$.
- JPM has historically traded at a significant premium compared to peers. JPM's P/B ratio has increased from 1.57 in 2022 to 1.87 in 2023. This, paired with its premium that has begun to dwindle throughout 2023 and into 2024, we believe competitors have an increased opportunity to outperform JPM.
- JPM is twice the size of its leading competitor and could face difficulties continuing to grow in a year where real GDP growth is expected to slow to 2\%.

## Risks to Thesis

- JPM has a well-diversified revenue stream comprising of various business segments that rival billion-dollar peers on its own. Its recent acquisition of First Republic Bank has grown its Wealth Management and Commercial Banking sectors by $20 \%$ and $46 \%$ YoY and should continue to maintain market share through 2024.
- JP Morgan is the largest bank with customer loyalty, a strong balance sheet, and good credit quality that would allow them to push through a potential recession or high interest rates for an extended period.

JPMorgan Chase \& Co. is the largest diversified bank in the world and operates through various divisions including Corporate and Investment Banking, Asset and Wealth Management, Commercial Banking, Consumer and Community Banking, and Private Banking. Headquartered in New York City, JP Morgan operates in over 100 countries and utilizes its various financial operating segments to serve millions of clients around the world.

## COMPANY DESCRIPTION

JPMorgan Chase \& Co. (JPM), often referred to as JP Morgan, stands as a powerhouse in the global financial market. Based out of New York City, JPM boasts a presence in more than 100 countries, catering to a vast clientele that spans corporations, governments, institutional investors, and everyday individuals. A geographic net revenue breakdown is shown below:

Source: JP Morgan 2023 10- K $_{[1]}$
JPM's rich history dates back to the 1800s, and over time, it has grown and adapted through mergers and acquisitions. The company has now solidified its position as a frontrunner in numerous financial services fields including Corporate and Investment Banking (CIB), Asset and Wealth Management (AWM), Consumer and Community Banking (CCB), and Commercial Banking (CB). JPM additionally has a corporate segment as well that provides internal services and is considered separate from the company's other four segments. These segments work synergistically to increase efficiency and offer a wide array of banking products and services to clients. A net revenue College of

- Business
breakdown between JPM's four segments for FY2023 is shown below:

## Consumer \& Community Banking

Consumer \& Community Banking serves individuals and small businesses through various channels such as bank branches, ATMs, online, mobile, and telephone banking. Within CCB, there are different areas:

- Banking \& Wealth Management
- Consumer Banking
- J.P. Morgan Wealth Management
- Business Banking
- Home Lending
- Production
- Servicing
- Real Estate Portfolios
- Card Services \& Auto

Banking \& Wealth Management as a whole offers a range of deposit, investment, lending, cash management, and payment services. Home Lending involves activities related to mortgage origination, servicing, and portfolios comprising residential mortgages and home equity loans. Card Services \& Auto division issues credit cards, provides travel services, and handles auto loan origination and
servicing, including leases. A general overview of the CCB segment financials is shown below:

| Consumer \& Community Banking |  |  |  |
| :--- | ---: | ---: | ---: |
| USD Millions | $\mathbf{2 0 2 3}$ | 2022 | 2021 |
| Non-interest revenue | $\mathbf{\$ 1 5 , 1 1 8}$ | $\$ 14,886$ | $\$ 17,092$ |
| Net interest income | $\mathbf{\$ 5 5 , 0 3 0}$ | $\$ 39,928$ | $\$ 32,787$ |
| Non-interest expense | $\mathbf{\$ 3 4 , 8 1 9}$ | $\$ 31,208$ | $\$ 29,028$ |
| Net income | $\$ 21,232$ | $\$ 14,916$ | $\$ 20,957$ |
| Total Assets | $\$ 642,951$ | $\$ 514,085$ | $\$ 500,370$ |
| ROE | $\mathbf{3 8 \%}$ | $29 \%$ | $41 \%$ |

Source: JP Morgan 2023 10-K ${ }_{[1]}$
CBB earned over \$70B in net revenue in 2023 representing a growth of $28 \% \mathrm{YoY}_{[1]}$. CBB deposits decreased slightly by $3.25 \%$ due to increased customer spending which was partially offset by the First Republic acquisition ${ }_{[1]}$. Loans also increased by $13 \%$ paired with higher interest rates were the primary drivers behind net interest income increasing in 2023 by $37.8 \%$ YoY ${ }_{[1]}$. JP Morgan's gross loans have grown at $7.5 \%$ CAGR over the past 5 years. This figure has been reduced to $6.5 \%$ CAGR in projections to account for an abnormal amount of growth in 2023 tied to the First Republic acquisition.

## Corporate \& Investment Banking

JPM's Corporate \& Investment Banking segment is made up of Banking and Markets \& Securities Services and provides a wide range of investment banking, marketrelated activities, lending, and treasury services to clients worldwide, including corporations, investors, financial institutions, merchants, and government entities. A general overview of the CIB segment financials is shown below:

| Corporate \& Investment Banking |  |  |  |
| :--- | ---: | ---: | ---: |
| USD Millions | $\mathbf{2 0 2 3}$ | 2022 | 2021 |
| Non-interest revenue | $\mathbf{\$ 4 0 , 3 1 5}$ | $\$ 36,202$ | $\$ 38,403$ |
| Net interest income | $\mathbf{\$ 8 , 4 9 2}$ | $\$ 11,900$ | $\$ 13,540$ |
| Non-interest expense | $\mathbf{\$ 2 8 , 5 9 4}$ | $\$ 27,350$ | $\$ 25,553$ |
| Net income | $\mathbf{\$ 1 4 , 1 2 9}$ | $\$ 14,925$ | $\$ 21,107$ |
| Total Assets | $\mathbf{\$ 1 , 3 3 8 , 1 6 8}$ | $\$ 1,334,296$ | $\$ 1,259,896$ |
| ROE | $\mathbf{1 3 \%}$ | $14 \%$ | $25 \%$ |

Source: JP Morgan 2023 10- $\mathrm{K}_{[1]}$
In banking, clients can access various investment banking services like corporate advisory, capital raising through equity and debt markets, and loan services. Additionally, the Payments division within Banking offers global payment solutions covering liquidity management,
commerce, clearing, and trade. Investment banking fees dropped by $5 \%$ in 2023 YoY mostly driven by advisory and debt underwriting fees dropping by $8 \% \mathrm{YoY}_{[1]}$. The decrease in the volume of deals in 2023 is the primary driver of the decrease in advisory and debt underwriting fees. This was partially offset by an increase of $11 \%$ YoY in equity underwriting fees ${ }_{[1]}$. JPM's CIB segment remains ranked \#1 in global investment banking fees among their peers so there is little concern given for CIB's recent drop in fees. We forecast investment banking fees will decrease by $1 \%$ YoY in 2024 and hold at a steady 1-2\% growth rate in the coming years as the investment banking market demand for deals continues to rebound from a challenging economic environment.

The Markets \& Securities Services division is split into two sections. Markets serve as a global market-maker for cash and derivative instruments, offering risk management solutions, prime brokerage, clearing, and research. Securities Services, on the other hand, is a top global custodian offering custody, fund accounting, and securities lending (primarily to asset managers, insurance companies, and investment funds, both public and private). Principal transactions have grown at a $22 \%$ CAGR and we expect sustained growth of $15 \%$ to continue through 2024 and another $10 \%$ in 2025.

## Asset \& Wealth Management

JP Morgan's Asset \& Wealth Management segment is a leading global player in investment and wealth management, boasting a remarkable \$5T in client assets.

In the realm of Asset Management, it offers a variety of investment solutions covering equities, fixed income, alternatives, and money market funds, serving both institutional and retail investors with a wide array of investment needs.

The Global Private Bank segment caters specifically to high-net-worth clients, providing them with an extensive range of services, including retirement products,
brokerage, custody, estate planning, lending, deposits, and investment management.

The majority of AWM's client assets are actively managed portfolios, demonstrating the firm's dedication to crafting personalized and actively adjusted investment strategies.

| Asset \& Wealth Management |  |  |  |
| :--- | ---: | ---: | ---: |
| USD Millions | $\mathbf{2 0 2 3}$ | 2022 | 2021 |
| Non-interest revenue | $\mathbf{\$ 1 3 , 5 6 0}$ | $\$ 12,507$ | $\$ 13,071$ |
| Net interest income | $\mathbf{\$ 6 , 2 6 7}$ | $\$ 5,241$ | $\$ 3,886$ |
| Non-interest expense | $\mathbf{\$ 1 2 , 7 8 0}$ | $\$ 11,829$ | $\$ 10,919$ |
| Net income | $\mathbf{\$ 5 , 2 2 7}$ | $\$ 4,365$ | $\$ 4,737$ |
| Total Assets | $\mathbf{\$ 2 4 5 , 5 1 2}$ | $\$ 232,037$ | $\$ 234,425$ |
| ROE | $\mathbf{3 1 \%}$ | $25 \%$ | $33 \%$ |

Source: JP Morgan 2023 10-K ${ }_{[1]}$
AWM's net income and net interest income were both up $20 \%$ in $2023 \mathrm{YoY}_{[1]}$. The First Republic acquisition provided JPM's AWM segment with higher average loans. Commissions and asset management fees both increase largely due to growth in private banking advisor teams. The First Republic acquisition has allowed JPM to grow its wealth management section and increase access to a wealthier group of clients.

## Commercial Banking

Commercial Banking offers a wide array of financial services tailored to different client groups, including lending, payment solutions, investment banking, and asset management products. These services are primarily targeted at three main client segments:

1. Middle Market Banking: This segment serves small and medium-sized businesses, local governments, and nonprofit organizations.
2. Corporate Client Banking: Catering to large corporations, this segment provides specialized financial solutions to meet their unique needs.
3. Commercial Real Estate Banking: This segment focuses on serving investors, developers, and owners involved in various types of real estate
properties, including multifamily, office, retail, industrial, and affordable housing.

Additionally, the "Other" category includes miscellaneous amounts that do not fall under any of the primary client segments.

| Commercial Banking |  |  |  |
| :--- | ---: | ---: | ---: |
| USD Millions | $\mathbf{2 0 2 3}$ | 2022 |  |

Source: JP Morgan 2023 10-K ${ }_{[1]}$
Net income increased by a staggering $46 \%$ in 2023 Yo $_{[1]}$. Net interest income was the primary driver behind this as it grew by 47\% due to deposit margins expanding on higher rates and higher average loans through the acquisition of First Republic ${ }_{[1]}$. While the interest spread should decrease in 2024, we forecast that lending and deposit-related fees will grow by $5 \%$ this year. We expect card income to increase by about $7 \%$ this year as well as consumer spending has continued to persist.

## Corporate

The Corporate segment is divided into two main parts:

- Treasury and Chief Investment Office ("CIO")
- Other Corporate.

Treasury and CIO primarily monitor and handle tasks related to measuring, monitoring, reporting, and managing the firm's liquidity, funding, capital, structural interest rate, and foreign exchange risks.

The Other Corporate division is made up of various staff functions and expenses that are centrally managed, along with specific firm initiatives and activities not directly tied to a particular business segment. Key functions within Other Corporate include Real Estate, Technology, Legal, Corporate Finance, Human Resources, Internal Audit, Risk Management, Compliance, Control Management, Corporate Responsibility, and several other corporate groups.

## RECENT DEVELOPMENTS

## Recent Earnings Announcement

JP Morgan reported its FY23 Q4 Earnings on January 12, 2024. The company reported revenue of $\$ 39.94 \mathrm{~B}$ which was a $12 \%$ growth YoY and slightly beat analysts' expectations of $\$ 39.78 \mathrm{~B}$. The company also reported a net income of just \$9.31B which represents a decline by $15 \%$ YoY and only $\$ 3.04$ EPS compared to expectations of $\$ 3.32$ EPS. CEO Jamie Dimon said this drop in EPS was largely due to having to pay a $\$ 2.9 \mathrm{~B}$ fee that was tied to government seizures relating to the regional bank failures in 2023. This fee was used to replenish losses from a fund that was utilized to help uninsured deposits from the failed regional banks. JPM stated that had this \$2.9B fee and \$743M in investment losses not been sustained, earnings would have been \$3.97 EPS. Jamie Dimon added the leading driver in record full-year earnings for the company was its net interest income and credit quality being higher than expected. The company has seen its stock price soar over $15 \%$ in the 3 months since Q4 earnings were released.

## First Republic Acquisition

On May 1, 2023, First Republic Bank failed and in turn, got purchased by JP Morgan. The company's loan-to-deposit ratio was standing at $111 \%$ which means they had loaned out more money than they had in customer deposits. JP Morgan saw this as an opportunity and acquired First Republic Bank to bolster its presence in private banking and wealth management. First Republic had a strong reputation for serving high-net-worth individuals, offering personalized services in areas like wealth management and lending. JP Morgan saw this acquisition as a way to improve its services for wealthy clients and strengthen its position in key markets. This in turn helped broaden JPMs revenue streams and expand its wealth management and private banking offerings. First Republic's customer deposits are now insured in a separate holding from JPM's current customers' deposits. This was done to ensure existing clients would not fear their money is not safe with JPM. In a year where JP Morgan set many personal bests in financial metrics, its acquisition of First Bank has played a big role. \$4.1B of the company's \$49B net income was directly from First Republic.

## INDUSTRY TRENDS

## Inverted Yield Spread

## Yield Spread: 10-Year Vs. 2-Year Treasury

Source: NetAdvantage - Multinational Banks ${ }_{[11]}$
The Treasury yield curve has plunged into negative territory since 2022. An inverted yield curve typically precedes a recession and while the U.S. has not gone into one yet, there is still about a $58 \%$ chance of a recession happening by March 2025[13].

Source: New York Fed ${ }_{[13]}$
The inverted yield curve could hurt bank profits from their assets and the possibility of a recession could make investors wary quickly. Consumer confidence has remained relatively strong, but it is something to monitor over the course of 2024 that could impact banks' performance.

## SVB Collapse

2023 was a year to forget for regional banks to put it lightly. On March 10, 2023, Silicon Valley Bank (SVB) became the third-largest bank failure in U.S. history. Following a bank run, the California Department of Financial Protection \& Innovation decided to close SVB and the FDIC would take control of all deposits and assets of the bank. On March 26, 2023, the FDIC entered into a purchase agreement for most of SVB's deposits which are now under the control of Silicon Valley Bridge Bank, National Association ${ }_{[14]}$.

While SVB was the first bank to fail in 2023, they certainly were not the last as Signature Bank, First Republic Bank, Heartland Tri-State Bank, and Citizens Bank all failed soon after. Each of these banks was acquired by a bigger bank, most notably First Republic Bank being acquired by JP Morgan. These regional banks needed bailed out and JP Morgan with the strongest balance sheet among banks found themselves in the mix. There has been a growing sentiment that the public feels less safe with their money in a smaller regional bank due to these closures. JP Morgan has found themselves as a beneficiary as customers feel safe putting their money in its accounts. After JPM's deposits slipped by about $5 \%$ in 2022, this public sentiment and the First Republic acquisition have allowed JPM to rebound and grow its deposits by about $2.6 \%$ in $2023[2]$. As the market continues to shift and rebalance, we project JPM's deposits to slightly decrease by $0.75 \%$ in 2024.

## MARKETS AND COMPETITION

When looking at JPM, it has a big conglomerate of banking products and services and is the biggest diversified bank in the world. The biggest competitors to JPM consist of: Bank of America Corp. (BAC), Wells Fargo \& Company (WFC), Morgan Stanley (MS), Goldman Sachs Group, Inc. (GS), and Citigroup Inc. (C).

| Company | Net Rev.* | Net Income* | Market Cap (\$B) |
| :--- | :---: | :---: | :---: |
| JPM | 158,104 | 49,552 | 567.9 |
| BAC | 98,581 | 26,515 | 297.0 |
| WFC | 82,597 | 19,029 | 208.7 |
| MS | 54,143 | 9,230 | 159.7 |
| GS | 46,254 | 8,516 | 141.1 |
| C | 78,462 | 9,382 | 121.8 |

Source: FactSet ${ }_{[2]}$
*figures in USD millions

## Threat of Substitutes

In the banking world, there is a wide range of alternatives available. Apart from the traditional roles of accepting deposits and loaning money, banks provide various services like insurance, mutual funds, and fixed-income securities. However, it is not just banks in the game-many non-banking financial firms offer similar services. And then there are unconventional players like Mercedes-Benz, General Motors, and Microsoft stepping into the ring, competing with big banks by offering attractive financing deals, sometimes even at 0\% interest rates, to customers purchasing high-value items.

## Competitive Rivalry

The diversified banking sector faces intense competition due to its long history and saturated market. To attract customers, banks often resort to offering lower financing rates and preferred investment services, which can reduce their profitability and lead them to pursue riskier ventures. Looking ahead, we expect more consolidation in the banking industry as larger banks may find it cost-effective to merge with or acquire smaller competitors instead of increasing spending on marketing. However, we also expect merger and acquisition activity to remain subdued in 2024, depending on factors like monetary policy changes and the emergence of catalysts amidst pent-up demand and stable interest rates.

## ESG Analysis

Source: Sustainalytics ${ }_{[15]}$
A company's ESG rating stands for environmental, social, and corporate governance rating. It has become increasingly important for companies to show investors, customers, and regulators that they are committed to
practicing sustainable operations as well as being socially responsible. The graph above shows MS, BAC, C, and JPM are at a medium risk whereas GS and WFC are considered high risk. This is largely due to these diversified and multinational banks financing a lot of fossil fuel companies and their operations. JP Morgan is the largest funder for fossil fuels in the world which is why they are near the higher end amongst their peers.

## Bank of America Corp. (BAC)

Bank of America Corp. is a financial institution and holding company that offers a range of banking and financial services. Its operations are divided into various segments including Consumer Banking (CB), Global Wealth and Investment Management (GWIM), Global Banking (GB), Global Markets (GM), and All Other. The company was established by Amadeo Peter Giannini in 1904 and is based in Charlotte, North Carolina.

| USD Million | $\mathbf{2 0 2 3}$ | 2022 | 2021 |
| :--- | ---: | ---: | ---: |
| Net Interest Income | $\mathbf{5 6 , 9 3 1}$ | 52,462 | 42,934 |
| Non-interest Income | $\mathbf{4 1 , 6 5 0}$ | 42,488 | 46,179 |
| Non-interest Expense | $\mathbf{6 5 , 8 4 5}$ | 61,438 | 59,731 |
| Net Income | $\mathbf{2 6 , 5 1 5}$ | 26,015 | 30,557 |
| Total Assets | $\mathbf{3 , 1 8 0 , 1 5 1}$ | $3,051,375$ | $3,169,495$ |
| Net Loans | $\mathbf{1 , 0 4 0 , 3 9 0}$ | $1,033,065$ | 966,737 |
| Total Deposits | $\mathbf{1 , 9 2 3 , 8 2 7}$ | $\mathbf{1 , 9 3 0 , 3 4 1}$ | $2,064,446$ |

Source: FactSet ${ }_{[2]}$
Bank of America has a well-diverse revenue stream with CB generating $42 \%$, GWIM generating $21 \%$, GB generating $25 \%$ and GM generating $20 \%$ while All Other brought revenue down by $\$ 8 \mathrm{~B}$. This revenue is highly concentrated in the U.S. at over $87 \%$, giving JPM an advantage in international exposure.

## Wells Fargo \& Company (WFC)

Wells Fargo \& Co. is a versatile financial services company rooted in communities. Its offerings span banking, insurance, investments, mortgages, and consumer and commercial finance. The company operates through segments including Consumer Banking and Lending (CBL), Commercial Banking (CB), Corporate and Investment Banking (CIB), and Wealth \& Investment Management (WIM). Established by Henry Wells and William G. Fargo on March 18, 1852, its headquarters are in San Francisco, California.

Source: FactSet ${ }_{[2]}$
Wells Fargo is most similar to JP Morgan in the way they diversify its business segments. A breakdown of its revenues can be seen below:

Source: WFC 2023 10-K ${ }_{[8]}$
WFC's revenue stream mix is almost identical to JP Morgan's except with a smaller corporate and investment banking sector. A key differentiator for JP Morgan however is WFC only operates within the U.S. which allows for JPM to have a geographical advantage. It should be noted that WFC tends to have a worse public reputation due to various regulatory issues revolving around sales practices and fraudulent accounts.

## Morgan Stanley (MS)

Morgan Stanley functions as a worldwide financial services enterprise, offering investment banking solutions to a diverse clientele ranging from corporations and governments to financial institutions and individuals. Its operations are organized into segments including Institutional Securities, Wealth Management, and Investment Management. Established by Harold Stanley and Henry S. Morgan in 1924, the company is based in New York City.

HERESEARCH

| USD Million | $\mathbf{2 0 2 3}$ | 2022 | 2021 |
| :--- | ---: | ---: | ---: |
| Net Interest Income | $\mathbf{8 , 2 3 0}$ | 9,327 | 8,045 |
| Non-interest Income | $\mathbf{4 5 , 9 1 3}$ | 44,341 | 51,710 |
| Non-interest Expense | $\mathbf{4 1 , 7 9 8}$ | 39,299 | 40,083 |
| Net Income | $\mathbf{9 , 2 3 0}$ | 11,179 | 15,120 |
| Total Assets | $\mathbf{1 , 1 9 3 , 6 9 3}$ | $1,180,231$ | $1,188,140$ |
| Net Loans | $\mathbf{2 1 8 , 6 4 0}$ | 213,785 | 188,134 |
| Total Deposits | $\mathbf{3 5 1 , 8 0 4}$ | 356,646 | 347,574 |

Source: FactSet ${ }_{[2]}$
Morgan Stanley compares very well to JP Morgan's investment banking and wealth management business sections. While still slightly smaller than JP Morgan's sectors, MS has a greater focus on wealth management as $45 \%$ of its revenue is derived from the sector.

## Goldman Sachs Group, Inc. (GS)

The Goldman Sachs Group, Inc. offers a range of financial services. It operates across distinct business segments including Global Banking and Markets, Asset and Wealth Management, and Platform Solutions. Founded by Marcus Goldman in 1869, the company is headquartered in New York City.

| USD Million | $\mathbf{2 0 2 3}$ | 2022 | 2021 |
| :--- | ---: | ---: | ---: |
| Net Interest Income | $\mathbf{6 , 3 5 1}$ | 7,678 | 6,470 |
| Noninterest Income | $\mathbf{3 9 , 9 0 3}$ | 39,687 | 52,869 |
| Noninterest Expense | $\mathbf{3 4 , 4 8 7}$ | 31,164 | 31,938 |
| Net Income | $\mathbf{8 , 5 1 6}$ | 11,261 | 21,635 |
| Total Assets | $\mathbf{1 , 6 4 1 , 5 9 4}$ | $1,441,799$ | $1,463,988$ |
| Net Loans | $\mathbf{1 8 3 , 3 5 8}$ | 179,286 | 158,562 |
| Total Deposits | $\mathbf{4 2 8 , 4 1 7}$ | 386,665 | 364,227 |

Source: FactSet ${ }_{[2]}$
Both Goldman Sachs and JP Morgan stand out as leading institutions in investment banking and market making. However, JP Morgan sets itself apart by also maintaining a significant portion of its revenue from Retail Banking, which enhances its revenue diversification compared to Goldman Sachs. Goldman Sachs heavily relies on its Global Banking and Markets segment, which contributes over 70\% of its revenue. In global M\&A Advisor rankings and Global Equity Capital Markets Bookrunning rankings, Goldman Sachs outperforms JP Morgan. However, JP Morgan holds a ranking edge in Global Debt Capital Markets and Global Investment Banking.

## Citigroup Inc. (C)

Citigroup, Inc. is a holding company that offers a variety of financial products and services. Its operations are divided into segments including Global Consumer Banking, Institutional Clients Group, and Corporate and Other. Established in 1812, the company is headquartered in New York City.

| USD Million | $\mathbf{2 0 2 3}$ | 2022 | 2021 |
| :--- | ---: | ---: | ---: |
| Net Interest Income | $\mathbf{5 4 , 9 0 0}$ | 48,688 | 42,494 |
| Non-interest Income | $\mathbf{2 3 , 5 6 2}$ | 26,670 | 29,390 |
| Non-interest Expense | $\mathbf{5 6 , 3 6 6}$ | 51,292 | 48,193 |
| Net Income | $\mathbf{9 , 2 2 8}$ | 14,845 | 21,952 |
| Total Assets | $\mathbf{2 , 4 1 1 , 8 3 4}$ | $2,416,676$ | $2,291,413$ |
| Net Loans | $\mathbf{6 7 1 , 2 1 7}$ | 640,247 | 651,312 |
| Total Deposits | $\mathbf{1 , 3 0 8 , 6 8 1}$ | $\mathbf{1 , 3 6 5 , 9 5 4}$ | $\mathbf{1 , 3 1 7 , 2 3 0}$ |

Source: FactSet ${ }_{[2]}$
Citi is a multinational bank with international operations making up over $50 \%$ of the company's revenue stream when compared to the U.S. JP Morgan dwarfs Citi's investment banking operations and has a more diverse revenue stream through its business segments. However, Citi boasts a strong consumer banking segment that features prominent credit card services as well as retail banking operations.

## ECONOMIC OUTLOOK

## Real GDP Growth

Multinational and diversified banks tend to do well when Real GDP is growing at a higher rate. Unfortunately, due to expected rate cuts towards the end of 2024, U.S. real GDP is expected to slow down. The World Bank is forecasting U.S. real GDP to be around $1.5 \%$ in 2024 which can be seen in the graph below:

## Real GDP Growth

Source: NetAdvantage - Multinational Banks $_{[11]}$
The IMF is projecting real GDP to be around $2.9 \%$ in 2024 which is more in line with our estimates. Regardless, as GDP slows in 2024, we can expect banks to have less demand for financial services, decreased investment activities due to investors becoming more cautious, and credit quality concerns. It is safer to invest in bigger financial institutions in this scenario with strong balance sheets in order to prevent potential debt repayment risks.

## Federal Funds Rate

When considering diversified and multinational banks, it is essential to look at global interest rates as each region can play a specific role in how a bank is able to lend and borrow money. We have seen global interest rates rise considerably over the past 2 years, most notably with the U.S. and the U.K. raising rates up to $5.25-5.50 \%$ in Q3 of 2023.

## Global Interest Rates

The Unverestry of lowa

Source: NetAdvantage - Multinational Banks $_{[11]}$
We expect at least 1 U.S. rate cut by the end of 2024 with a possibility of 2 or 3 . This would reduce the amount of interest banks can charge clients for loans while simultaneously reducing the interest banks must pay clients on interest-bearing accounts. Historical trends have shown when interest rates are reduced, interest spreads also reduce ${ }_{[12]}$. This reduction can be offset by increased consumer confidence and loan demand. Overall, lowering interest rates should be beneficial for diversified banks in 2024 but it is important to monitor lending demand as rate cuts occur.

## VALUATION

## Loans

This is the largest asset account for JPM, making up over $34 \%$ of its total assets. JPM's gross loans have been growing at a $7.33 \%$ CAGR over the last 5 years. The company's acquisition of First Republic drastically increased JPM's gross loans in 2023. As interest rate cuts are delayed, the demand for loans in 2024 should decrease as well. Due to the uncertainty in interest rates over the next few years, we have opted to grow the company's gross loans at a $4.5 \%$ CAGR for the forecasted term.

## Deposits

This is the largest liability account accounting for $68 \%$ of total liabilities. Of the $\$ 2.4 \mathrm{~T}$ in customer deposits, about $28 \%$ of them are non-interest-bearing accounts compared to $72 \%$ being interest-bearing accounts. Since JP Morgan loans money based on the amount of customer deposits available to them, we forecasted deposits as a percentage of loans. Historically, deposits have ranged from 150\%$200 \%$ depending on economic conditions. As high interest rates persist for the foreseeable future with slowing Real GDP growth, we have decided to forecast customer deposits at a slightly conservative value of $178 \%$ of gross loans.

## Net Interest Income

Net Interest Income is the interest income a bank generates minus the interest expense a bank incurs. JPM experienced a record year for net interest income as it grew almost $34 \%$ to nearly $\$ 90 \mathrm{~B}$ in 2023 . We believe this level of net interest income is unsustainable due to its
recent acquisition of First Republic. We project JPM's loan volume to increase at a rate of $4.5 \%$ CAGR and have forecasted average interest income rates at $8.5 \%$ before slowly dwindling to $6.5 \%$ in the forecasted timeline. JP Morgan has been able to pay lower interest rates on customer deposits primarily due to market share and name recognition compared to its peers. As interest rates begin to decrease over the next few years, we project to see JPM's Interest expense decrease from $3 \%$ to $1.25 \%$ in the forecasted timeline.

## Non-Interest Income

Non-interest income represents the revenue generated by JP Morgan outside of its conventional banking activities. This includes revenue through investment banking fees, principal transactions, various lending and deposit-related charges, asset management fees, mortgage-related fees, card income, and more. The two largest revenue accounts consist of principal transactions making up $36 \%$ of total non-interest revenue and asset management fees making up $22 \%$ of non-interest revenue. We project asset management fees to grow by $4 \%$ in 2024 due to an increase in investors seeking guidance in volatile markets.in asset management fees in 2023, driven by investors seeking guidance from professional advisors in volatile markets. Our projections for total fee income are conservative at a CAGR of $3.97 \%$ through the forecasted period.

## Cost of Equity

We calculate our Cost of Equity through the CAPM model, including the following factors:

- 10-year U.S. Treasury rate: $4.35 \%$
- JPM's 2-year weekly Raw Beta derived from Bloomberg: 1.002
- Equity Risk Premium estimate from the Henry Fund: 5.00\%

We came to an estimated Cost of Equity of 9.36\%.

## DCF Valuation

We built both a Discounted Cash Flow (DCF) model and an Economic Profit (EP) to derive a target price of $\$ 160$. We calculated Free Cash Flow to Equity (FCFE) and Equity EP to account for interest accounts that would not normally be included in a DCF and EP model but are necessary for
valuing a bank. Our key assumptions included a CV year ROE of $10.43 \%$ and our cost of equity at $9.36 \%$.

## DDM Valuation

Our Dividend Discount Model relies on the premise that JPM will continue to pay a dividend consistent with historical trends of increasing at a steady, predictable rate. In Q1 of 2024, JPM announced a dividend of $\$ 1.15$ we assume that will continue quarterly through 2024 resulting in a $\$ 4.60$ DPS in 2024. We have then continued to grow JPM's DPS by $\$ 0.40$ per year for 5 years and then by $\$ 0.60$ for the remaining 5 years. Our model was computed with a $3.5 \%$ continuing value (CV) growth of EPS, a CV year ROE of $10.43 \%$ due to limited growth potential, and our cost of equity of $9.36 \%$. This model gave us an intrinsic value of $\$ 159$ which is consistent with our DCF valuation model.

## Relative Valuation

Our relative valuation model is based on the peer group discussed within our Markets and Competition section. We believe each peer has a distinct comparison to JPM in one way or another but there is quite a discrepancy in the trading multiples resulting in a very low target price of $\$ 124$. We believe banks' P/E ratios are not the best way to value the company and rather focused our attention on Price/Book Value (P/B) based on each company's 2023 book values. The peer average $P / B$ value was $1.18 x$ compared to JPM having a current P/B value of 1.87 x . We believe that due to JPM's size profile and diversified business segments, our relative valuation does not accurately value JPM.

## KEYS TO MONITOR

## JP Morgan Drivers

Regional Bank Failures: The recent trend in regional bank failures that plagued 2023 ended up benefitting JP Morgan in a variety of ways. They were able to purchase First Republic Bank following its failure which directly benefited the company's loan volume as well as increased its interest spread on loans as well. JPM was able to grow its AWM and CB business segments by $20 \%$ and $47 \%$ respectively as well.

Indirectly, other regional bank failures allowed JP Morgan to benefit off the backs of wary customers who were looking for safety after their regional bank failed. As high
interest rates look to persist through 2024, we could very well see more regional banks fail through the rest of the year which would have a positive impact on JP Morgan's customer deposits.

Size and Diversification: JP Morgan has nearly double the market cap of its closest peer and boasts a robust balance sheet with nearly $\$ 3.9 \mathrm{~B}$ in assets diversified across 4 major business segments. Each business segment is bigger than most regional banks, allowing JP Morgan to be a comfortable place for customers to deposit and invest within hardened economic conditions.

## JP Morgan Risks

Limited Growth Potential: While size can be a pro for JP Morgan, it can also be a massive deterrent in the investing market. As big as JPM has grown compared to its peers, it will often need to look to M\&A or rely on market growth within its operating sectors. In an economy where real GDP is expected to be slow and interest rates will remain elevated for the foreseeable future, market growth will be severely hard to come by. JP Morgan's main other option would be to take the risk of overpaying for a smaller company to increase its earnings.

Unsustainable Interest Income: Interest income generated was at an all-time high of $\$ 171 \mathrm{~B}$ in 2023 representing an increase of $84 \% \mathrm{YoY}$. This was largely due to increased loan volume with higher interest rates that were acquired through the First Republic transaction. In a year where loan volume was expected to increase marginally, the acquisition drove gross loans to increase by almost $17 \%$. In 2024 we expect there to be smaller growth by $4.5 \%$. If loans continue to grow at a high rate in high interest rate environments, however, JPM could perform well in 2024.
