COMPANY DESCRIPTION

BYD is a major U.S. casino operator with 28 properties across ten states: Nevada, Illinois, Indiana, Iowa, Kansas, Louisiana, Mississippi, Missouri, Ohio, and Pennsylvania. The company focuses on regional markets through five main segments: Las Vegas Locals, Downtown Las Vegas, Midwest and South, Online Gaming, and Managed. The Online Gaming segment, primarily introduced through the 2022 Pala Interactive acquisition and 2024 Resorts Digital purchase, targets digital sports betting and iGaming.¹

BYD vs. SPX & BJK

The price chart below displays BYD's performance relative to SPX and BJK. SPX is our benchmark, and BJK is a broad Casino and Gaming ETF with a mandate requiring 50% of company revenues coming from gaming to be eligible for inclusion.

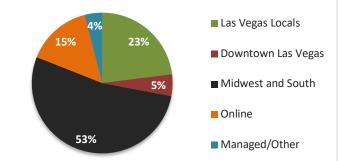

Source: Data from Yahoo Finance²

In our view, now is the time to exit BYD. BYD has closely tracked our initial thesis relating to online gaming; however, we see opportunities elsewhere in online pure plays.

Business Segments

BYD operates through five segments: Las Vegas Locals (23% of Sales), Downtown Las Vegas (5% of Sales), Midwest and South (52% of Sales), Online Gaming (15% of Sales), and Managed/Other (4% of Sales).¹ F24 revenues totaled \$3.9 billion, up 5.1% Y/Y, primarily driven by online revenue (+44% Y/Y) while the company's physical casino locations continued to struggle (-1.1% Y/Y).

Source: BYD 10K

BYD has a significant presence in the Midwest and South regions, which in our view is the key differentiator vs. the peer group. Given that most of their casinos are not necessarily in places one would consider a tourist destination, we question the need to have such a large buildout in terms of rooms available at each casino (as reflected in the occupancy rates).

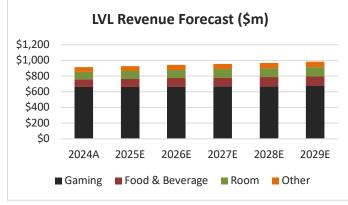

Source: Seeking Alpha

Las Vegas Locals (LVL)

The LVL segment consists of eight casinos (Gold Coast, The Orleans, Sam's Town, Suncoast, Eastside, Aliante, Cannery, and Jokers Wild) that serve the resident population in the Las Vegas metropolitan area.¹ Competition in Las Vegas is fierce, causing BYD to compete against larger casinos that have the ability to offer stronger promotions for their customers. The segment boasts 675,652 sq. ft. of casino space and 8,784 slot machines. On the hotel and resort side, LVL has 4,064 rooms with an average occupancy rate and average daily rate of 69% and \$86, respectively.¹ We note that various casinos in this segment lean on the older side (1979, 1993, and 2004), and have scheduled renovations that have potential to introduce margin pressures. In our view, this creates potential for more price conscious consumers to stay here – yet choose to dine and

game in a more modern experience. Our forecast for LVL incorporates data from LVCVA that shows visitor volume (+0.2%), hotel occupancy (+2.0%), and convention attendance (+42.7%) are on the turnaround, and thus grow revenue at a five-year CAGR of 1.5%.³

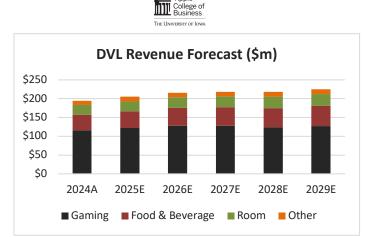

Source: BYD 10K, HF Model

Downtown Las Vegas (DVL)

The DVL segment consists of three casinos which directly compete with nine other casinos in downtown Las Vegas (California, Fremont, and Main Street Station).¹ To differentiate from competing casinos, BYD employs a rather unique strategy: focusing on customers largely from Hawaii by building relationships with Hawaiian travel agencies and building custom Hawaiian promotions.¹ The strategy appears to be quite effective, as guests from Hawaii comprised 74% of occupied room nights at the California, 35% at the Fremont, and 45% at Main Street Station. Although we foresee a reduction in travel from Hawaii to Las Vegas given recent economic trends, we note that travel will still occur (albeit in smaller numbers) given Hawaii's no gambling laws currently in place. The segment represents 104,735 sq. ft. of casino space and 2,090 slot machines. On the hotel and resort side, DVL has 1,632 rooms with an average occupancy rate and average daily rate of 71% and \$56, respectively. Similarly to LVL, these properties lean on the older side (1975, 1985, and 1993).¹

Our revenue forecast for DVL incorporates the same general view as LVL; however, we also factor in the notable increase in Average Daily Rates (ADR, +3.7%) and Revenue per Available Room (RevPAR, +6.3%).³ We note that the ADR for properties in this segment is roughly \$56 (vs. Las Vegas ADR of \$194), giving us confidence that BYD can increase prices while still attracting bargain travelers. Our assumptions result in a five-year revenue CAGR of 3.0%.

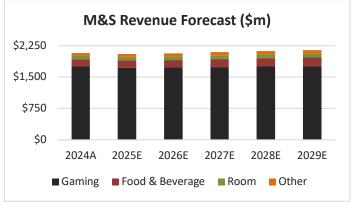

Source: BYD 10K, HF Model

Midwest and South (M&S)

The M&S segment consists of five land-based casinos, five dockside riverboat casinos, three racinos, and four bargebased casinos that operated in nine states.¹ The segment represents 983,676 sq. ft. of casino space and 17,228 slot machines. On the hotel and resort side, M&S has 4,785 rooms with an average occupancy rate and average daily rate of 50% and \$90, respectively.¹ Most of the casinos in this segment are newer in nature aside from Par-A-Dice (1996) and Blue Chip (1999).

Our forecast for M&S considers the fact that the properties under this segment have lower hotel occupancy rates relative to LVL and DVL (50% vs. 69% and 71%, respectively). Within BYD's latest 10K, they note that M&S primarily serves customers within a 100-mile radius; we feel that the dynamic of traveling to a casino in the Midwest and South is completely different relative to Las Vegas and thus assume that growth in this segment will remain muted as online takes the share. We grow revenue at a five-year CAGR of 0.7%.

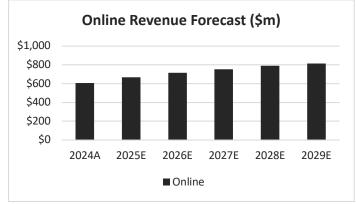

Source: BYD 10K, HF Model

<u>Online</u>

The online segment was introduced in 2021 through a partnership with FanDuel, in which the two companies collaborated to launch Stardust-branded online casinos in New Jersey and Pennsylvania.¹ As part of the partnership, BYD acquired a 5% equity stake in FanDuel. Since the creation of this segment, BYD has announced several partnerships & acquisitions to strengthen its presence in the online gambling market (Pala Interactive and Pala Canada in 2022, Resorts Digital Gaming in 2024). Since 2021, online revenue has quickly taken share from the company's traditional gaming revenue, moving from 5.1% of revenues in 2021 to 15.4% in 2024 (traditional gaming revenue shifted from 80.3% to 65.7%). We certainly agree that online gaming is the future for the Casinos and Gaming industry; however, we worry about the capitalintensive nature of BYD's existing 28 physical casino locations.

In our view, online gaming will continue to cause dramatic shifts in the Casino and Gaming industry. Given the commentary and statistics mentioned <u>here</u>, we grow BYD's online gaming revenues at a five-year CAGR of 6.1%.

Managed

Revenue for the Managed segment is directly tied to BYD's agreement with Wilton Rancheria, a federally recognized Native American tribe, to manage the Sky River Casino.¹ The casino is located in Sacramento, California, and has over 2,100 slot machines and 80 table games with 18 food and beverage options.¹ The casino has two expansion phases in the works, including adding 400 slot machines and a 1,600-space parking garage by Q1 2026, and an addition of 300 hotel rooms, two food and beverage outlets, a spa, and an entertainment center by mid-2027.¹

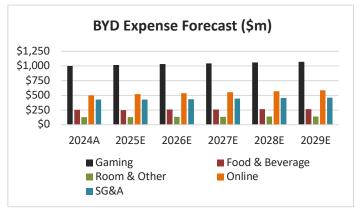

Our forecast for Managed incorporates our assumptions on the incremental revenue generation that will come through the two expansion phases discussed above. We grow revenues at a five-year CAGR of 3.0%.

Source: BYD 10K

Cost Structure Analysis

The majority of BYD's expenses (77%) are tied to gaming, food and beverage, room, online, and SG&A expenses. The remaining 23% comes through lease rental agreements, maintenance and utilities, and other corporate/project development expenses. We expect that the increasingly competitive nature of the Casino and Gaming industry will continue to contract margins and note that costs have outpaced revenue growth by a wide margin in recent years (3-year average growth rate in total expenses of 6.7% vs. a 3-year average growth rate in revenue of 5.3%). For our forecast, we assume a 5-year average growth rate in total expenses of 2.5% vs. a 5-year average growth rate in revenue of 2.0%. Further commentary as it relates to our margin assumptions can be found here.

Source: BYD 10K, HF Model

Debt Maturity Analysis

BYD's weighted average interest rate on debt is 5.6%, with a mix of 59.4% (64.5% in 2023) fixed rate debt and 40.6% (35.5% in 2023) variable rate debt.¹ Total long-term debt sits at \$3,200.2 million, up \$253.5 million from 2023 levels. The total debt burden is comprised of a \$1,300.3 million Credit Facility, \$1,000.0 million in 4.75% senior notes due in 2027, and \$900 million in 4.75% senior notes due in 2031.¹ The Credit Facility can be further broken down into \$475 million attributable to a Revolving Credit Facility, \$759 million in a Term A Loan, and \$66.3 million in a Swing Loan. The Revolving Credit Facility and the Term A Loan mature on March 2, 2027. BYD holds a BB rating from S&P Global.¹ BYD's credit rating is roughly in line with the entire peer group, with LVS being the only company holding an IG rating.

| Peer Group Credit Ratings | | | |
|---------------------------|------------|--|--|
| Ticker | S&P Rating | | |
| CZR | BB- | | |
| MGM | B+ | | |
| DKNG | BB | | |

Source: FactSet

In our view, the maturities of \$44.0 million in 2025 and 2026 are manageable, as we forecast roughly \$1 billion in CFO until 2029. Additionally, we believe the maturities in 2027 and thereafter (2031 maturity) will likely require refinancing.

| Fiscal Year | Payment (\$M) |
|----------------------|---------------|
| 2025 | 44.0 |
| 2026 | 44.0 |
| 2027 | 2,212.3 |
| 2028 | - |
| 2029 | - |
| Thereafter | 900.0 |

ESG Analysis

BYD is positioned in-line with most of our peer group as it relates to ESG (CZR stands out with the lowest risk score and risk rating). In our view, the ratings provided by Morningstar Sustainalytics place a large weight socially

given the addictive aspect that comes with gambling or visiting any of the peer group's properties or websites. The National Council on Problem Gambling (NCPG) recently announced that roughly 5 million Americans meet the criteria for compulsive gambling, while only 8% of these individuals will ever seek help.⁴ We note that this trend is likely to magnify in the future, as a study published in the Psychology of Addictive Behaviors found that 91% of college men and 84% of college women reported they gambled.⁴

We ultimately feel as though BYD does not have a strong balance in terms of social, environmental, and governance issues. Looking at their <u>Corporate Social Responsibility</u> <u>Report</u>, we find it alarming that a company that engages in providing services that can potentially ruin families or an individual's life, resorted to burying their initiatives on page 52 (out of 107).⁵

| ESG Peer Comparison | | | | |
|---------------------|-------------------------------|--------|--|--|
| Ticker | Ticker Risk Score Risk Rating | | | |
| CZR | 19.9 | Low | | |
| MGM | 24.3 | Medium | | |
| DKNG | 34.8 | High | | |
| LVS | 20.7 | Medium | | |
| WYNN | 25.0 | Medium | | |
| BYD | 20.2 | Medium | | |

Source: Morningstar Sustainalytics⁶

What is Smart Money Doing?

Since September 2022, sell-side recommendations have shifted from 85/15 to 56/44 (buy/sell). The company has a notable history of beating EPS expectations Q/Q, with June 2023, September 2023, and March 2023 being the only quarters to not beat since Q2 2020. A relatively similar pattern is shown through revenue.⁷ In our view, this could indicate that management consistently provides conservative guidance. See the "Henry Fund vs. Consensus" section below to see where we differ through 2027.

On the buy-side, value and deep value strategies have seen a net inflow over the past six months, while GARP and growth strategies have seen a net outflow. Short interest sits at 4.3% and has continued to decrease from the high of 7.5% in 2022.⁷

RECENT DEVELOPMENTS

Recent Earnings Announcement

BYD reported Q4 and F24 results on February 6, 2025. President and CEO Keith Smith highlighted a successful 2024, driven by a diversified business model, operational efficiencies, and recent property investments. The company achieved record full-year revenues of over \$3.9 billion and EBITDAR of nearly \$1.4 billion, with propertylevel operating margins exceeding 40%. For Q4, revenues surpassed \$1 billion for the first time, with EBITDAR nearing \$380 million.⁷ Crucial comments and results from the transcript include:

- Las Vegas Locals: operating margins above 50% and growth in core customer play
- **Downtown Las Vegas:** Q4 results supported by property enhancements, with stable Hawaiian visitation and steady pedestrian traffic
- Midwest & South: growth led by Treasure Chest Casino's new facility
- **Online:** generated \$108 million in full-year EBITDAR (including \$32 million in one-time fees)
- Managed: generated \$96 million in full-year EBITDAR

Below, we lay out management's guidance and outlook for 2025:

- **Online EBITDAR:** \$80 to \$85 million, up from \$76 million in 2024
- Capex: \$600 to \$650 million, including \$250 million for maintenance, \$100 million for refurbishments, \$100 million for property growth, and \$150 million for misc.

Virginia Resort Project

BYD, in collaboration with the Pamunkey Indian Tribe, broke ground on their Norfolk, VA casino and resort on October 30, 2024. The project was initially proposed in 2018 and approved by voters in 2020. In April 2021, renderings of the project estimated a \$500 million price tag and a total of 300 rooms.⁸ The project has faced numerous delays relating to regulatory approvals, which caused billionaire Jon Yarbrough to sell his majority share (80%) to BYD. Since BYD's involvement, the project has escalated to a \$750 million price tag and is scheduled to open in 2027.⁹ The resort will feature a 200-room hotel, eight food and beverage locations, and a casino with 1,500 slot machines and 50 table games. Management expects

this facility to generate roughly \$3 billion in local economic benefits during its first 10 years of operation.⁹

Eastside Cannery Land Purchase

BYD acquired the assets of Cannery Casino Resort in 2016 for \$230 million, including the Cannery Hotel & Casino in North Las Vegas and Eastside Cannery. The hotel remained operational until March 2020, when its 300-plus rooms, 64,000-square-foot casino, and 20,000 square feet of meeting and ballroom space were ordered to close to help contain the spread of COVID-19. While Nevada's casinos were allowed to reopen in June 2020, this property remained closed.¹⁰

In April 2024, Michelle Rasmusson, BYD's Chief Compliance Officer, stated in a letter to Clark County officials that "economic conditions and demand" as well as "significant workforce challenges" would determine when the property <u>might</u> reopen.¹⁰

In our view, it would be reasonable to assume that BYD has considered selling the property – yet the company continues to spend \$500,000 per month on maintenance, IT systems, security, and water the keep the property operational. Not to our surprise, these costs do not include the millions of dollars spent annually on rent, as BYD did not own the land beneath the property until recently.

In February 2025, BYD purchased the land under the property for \$45 million. When asked about the rationale for the purchase and any plans to reopen the property, a BYD spokesperson responded, "We do not have anything additional to share at this time."¹⁰

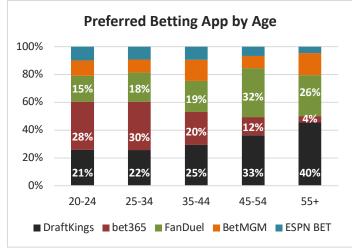

INDUSTRY TRENDS

Online Gambling

We view online gambling as a key catalyst for the Casino and Gaming industry going forward. It is clear to us that most consumers prefer to gamble away their hard-earned dollars from the comfort of their homes, as the online gaming industry saw revenue growth of 24.6% in 2024 vs. land-based gaming's growth of 0.6%. Additionally, 95% of the money wagered on sports in 2024 was online.¹¹

In our view, the companies that prioritize investments into creating the best app experience will benefit the most as the industry continues to transition online. The following chart displays the most popular apps by age range:

Source: YouGov

We also note the following statistics to demonstrate the importance of developing the best in-app experience:¹¹

- 74% of sports bettors said that the ability to place bets easily while watching sports is essential
- 69% of bettors aged 34-44 considered live sports streaming an important feature in a betting app (DKNG: BetVision for example)
- 60% of bettors said they are more likely to use an app that is linked to a sports streaming service

MARKETS AND COMPETITION

To define our peer group, we selected companies that have a similar presence as it relates to physical casinos. We also searched for companies that provided a similar and granular revenue decomposition, enabling us to compare revenues by category. We include DKNG given our view on online gaming, and BYD's presence within the space.

| Ticker | Rev ('24, \$m) | Net Margin | # Properties |

| BYD | \$3,930 | 14.7% | 28 |

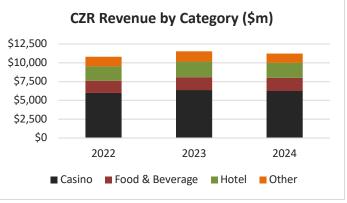

Source: FactSet, Company 10Ks

Caesars Entertainment (CZR)

CZR is a leading global gaming and hospitality company headquartered in Las Vegas, Nevada. It operates through

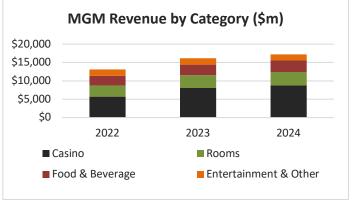

four primary segments: Las Vegas, Regional, Caesars Digital, and Managed/Branded.¹² The company continues to expand into digital gaming, with its Caesars Sportsbook platform increasingly gaining traction. On January 15, 2025, CZR announced a strategic partnership with Bragg Gaming as it relates to CZR's online technology.¹³

MGM Resorts (MGM)

MGM is a global entertainment and hospitality company headquartered in Las Vegas, Nevada. It operates through four segments: Las Vegas Strip Resorts, Regional Operations, MGM China, and MGM Digital.¹⁴ A key highlight is MGM's BetMGM platform, a joint venture rapidly expanding in the online sports betting and iGaming space. On November 18, 2024, MGM unveiled plans to integrate AI-driven guest experience tools across its properties, aiming to set a new standard in personalized hospitality.¹⁵

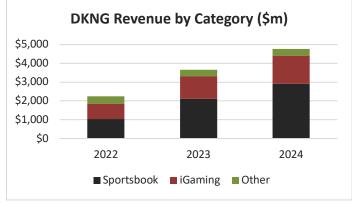

Source: MGM 10K

Draft Kings (DKNG)

DKNG is a leading digital sports entertainment and gaming

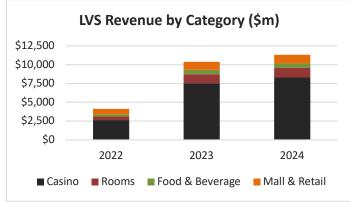

company which provides users with online and retail sports betting (Sportsbook), online casino (iGaming), and daily fantasy sports product offerings.¹⁶ The company's current technology is highly scalable with minimal incremental spend required to launch its product offerings in new jurisdictions. DKNG continues to scale in terms of Monthly Unique Payers (MUP), which hit 3.7 million in 2024 (up from 2.7 in 2023 and 1.9 in 2022).

Source: DKNG 10K

Las Vegas Sands (LVS)

LVS is a global developer and operator of integrated resorts, delivering a blend of luxury hotels, world-class gaming, entertainment, retail, and convention facilities. The company operates properties such as The Venetian Macao, The Londoner Macao, The Parisian Macao, and the Sands Macao.¹⁷

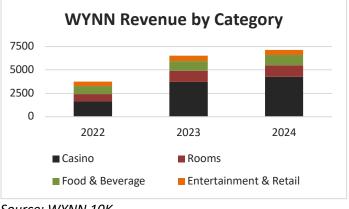

Source: LVS 10K

Wynn Resorts (WYNN)

WYNN is a well-known designer, developer, and operator of integrated resorts featuring luxury hotel rooms, highend retail space, an array of dining and entertainment

options, convention facilities, and gaming. WYNN operates through four segments: Macau Operations, Las Vegas Operations, Encore Boston Harbor, and Corporate.¹⁸

Key Operating Metrics

Although DKNG does not report many of the statistics below (due to its heavy online presence and lack of physical casinos), it stands out to us as the best-positioned to capitalize on the trend of online gaming. Due to its online-only model, DKNG avoids the lofty capital expenditures required for physical properties. With no owned casinos, hotels, or real estate – unlike CZR's 55 properties and ~3.8 million square feet of casino space – DKNG eliminates costs associated with renovations, maintenance, and even insurance on properties.

Among physical operators, CZR is best positioned due to its scale – 48,520 rooms, 85-90% occupancy rate, and \$125-140 RevPAR – spanning U.S. and international markets, but its broad footprint dilutes margins and requires significant capex upgrades. LVS and WYNN excel in luxury, with LVS achieving a 93-94% occupancy rate and \$190-215 RevPAR across 7 properties, while WYNN leads with \$240-250 RevPAR and \$270-280 ADR across 4 properties. MGM and BYD lag, primarily due to their regional focuses and ongoing capex needs.

| Company | # of Properties | Square Ft. (Casino) | Occupancy % |
|-------------------|--------------------|------------------------|----------------|
| CZR | 40 | 3,700,000 | 85-90% |
| MGM | 16 | 2,512,000 | 90-92% |
| DKNG ¹ | - | - | - |
| LVS | 6 | 1,621,000 | 93-94% |
| WYNN | 4 | 1,167,000 | 92-93% |
| BYD | 28 | 1,764,063 | 85-87% |

Profitability

BYD leads the peer group with the highest gross margin, operating margin, and free cash flow margin. In our view, this could be a culmination of two factors: delayed capex spend (most of their casinos are old in nature) and/or lower overhead costs (regional operations with a heavy focus in the Midwest).

To support our "DKNG is the best positioned" statement above, it is important to highlight that the company is clearly heading towards a profitable future. The following chart displays DKNG's gross margin, operating margin, and net margin over the past four years (2021 through 2024):

Source: FactSet

| Company | Gross Margin | OP Margin | FCF Margin |
|-----------------|-----------------|-----------|------------|
| CZR | 42.3% | 22.2% | 4.7% |
| MGM | 40.7% | 9.6% | 7.0% |
| DKNG | 38.1% | -10.5% | 8.6% |
| LVS | 36.8% | 21.8% | 14.0% |

BS / CF Snapshot

As shown below, the capital-intensive nature of building physical and online casinos leads to extremely levered companies. Each company in the peer group is in a net debt position (total debt less cash & equivalents) with D/E ratios exceeding 100%. We label WYNN's D/E as not-meaningful, as retained earnings turned negative during the COVID-19 pandemic after the company reported a \$2 billion loss, leading to a negative D/E ratio.

| Company | Net Debt | D/E | FCF | FCF Conversion |
|---------|-------------|----------|-------|-------------------|
| CZR | 24,672 | 566.8% | 545 | 14.3% |
| MGM | 29,438 | 1,053.5% | 1,214 | 48.7% |
| DKNG | 530 | 132.1% | 408 | -176.8% |
| LVS | 10,290 | 483.4% | 1,577 | 40.5% |
| WYNN | 9,840 | NM | 1,006 | 55.9% |
| BYD | 3,609 | 248.6% | 557 | 45.8% |

ECONOMIC OUTLOOK

Disposable Personal Income

Disposable income is an important metric to track for most companies, and especially so for ones in the Casino and Gaming industry. If disposable income begins to fall, consumers are less likely to spend on discretionary items such as hotels, gambling, and events. The most recent

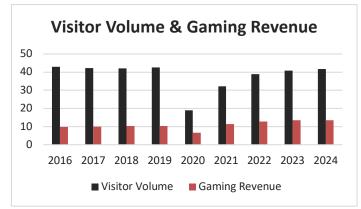

readings from the Bureau of Economic Analysis show a decline from the values recorded in September and October of 2024 (+0.2% and +0.4%, respectively), with November and December coming in at +0.1%.¹⁹

Given the recent threats of tariffs by the Trump Administration, we do see potential for disposable personal income to fall if implemented, and a recession would only magnify that decrease.

Las Vegas Tourism Activity

We view Las Vegas tourism activity as a key indicator for our peer group given the overwhelming amounts of assets in Las Vegas relative to their total portfolios. The following chart displays that although there has certainly been a rebound in visitor volume, we have yet to see that number break above the previous high in 2016. The other side to the equation is how much these visitors are spending, which although it shows a similar trend, hit an all-timehigh of \$13.6 billion in 2024:

Source: LVCVA *Volume in mm, Revenue in bn

We do not have a strong view on Las Vegas tourism activity. On one hand, we could see further gains in both visitor volume and gaming revenue, and on the other, we see potential for decreasing disposable income levels causing a reduction, as mentioned above.

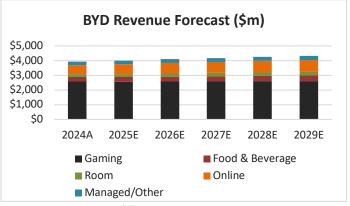

VALUATION

Revenue Assumptions

Our revenue assumptions are explained in detail <u>here</u>. We differ from Street forecasts by +1% in each year throughout our forecast, primarily driven by our assumption that online revenue growth continues the momentum seen historically. On a firm wide basis, our

revenue forecast reflects a five-year revenue CAGR of 2.0%, resulting in \$4.3 billion in revenue by 2029.

Source: BYD 10K, HF Model

Margin Assumptions

Our margin assumptions for BYD reflect a notable contraction from the highs seen in 2022, driven by intensifying competitive pressures, particularly within online gaming. We forecast gross margin to decline from 48.7% in 2022 to 42.9% in 2029, operating margin to compress from 27.6% to 21.6% in 2029, and net margin to fall from 18% in 2022 to 13.0% in 2029. Our forecast is primarily driven by the cost of online revenues as a % of sales rising to 14.2% in 2029 (from 12.7% in 2024), driven by heightened promotional spending required to maintain/grow share. We also assume a slight uptick in lease payments (from 2.8% of sales to 2.9%), maintenance (from 3.8% of sales to 3.9%), and project development (relative to historical values).

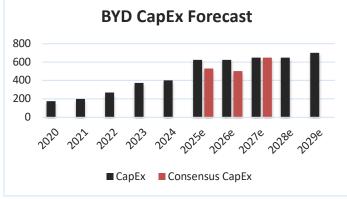

Source: BYD 10K, HF Model

CapEx

Given the old nature of the majority of BYD's assets, we forecast a sharp uptick in CapEx relative to historical

periods. Our CapEx assumption in 2025 is in-line with management guidance (between \$600 - \$650 million) and increases to \$700 million by 2029. The chart below displays our forecast relative to consensus:

Source: HF Model, FactSet

Payout Policy

We forecast BYD's dividend to increase by \$0.04 in each year throughout our forecast and maintain a dividend payout ratio roughly in-line with historical payouts.

WACC

Our discount rate for BYD is 9.12%. The cost of equity was calculated using the risk-free rate of 4.34%, a beta of 1.55 (5-year monthly beta), and an equity risk premium of 5.00%. These inputs resulted in a cost of equity of 12.09%. The after-tax cost of debt was calculated using a pre-tax cost of debt of 5.85% (sourced from FactSet) and a tax rate of 22%. These inputs resulted in an after-tax cost of debt of 4.56%. The weight of equity and debt were calculated to be 60.56% and 39.44%, respectively.

DCF and **EP**

Our enterprise discounted cash flow (DCF) and economic profit (EP) models resulted in an intrinsic value per share of \$56. The primary inputs used in these models consisted of TV growth of 3.00% for NOPLAT, a TV ROIC of 12.99%, and a discount rate of 9.12%.

DDM

Our dividend discount model (DDM) resulted in an intrinsic value per share of \$46. The primary inputs used in this model consisted of TV growth of 3.00% for EPS, a TV ROE of 15.85%, and a cost of equity of 12.09%.

Relative Valuation

Our relative valuation models leveraged a FY1 and FY2 P/E, P/S, and EV/EBITA multiples. To mitigate the impact of outliers, we utilized a harmonic mean. The following table displays the values used for each multiple and the resulting implied relative value:

| Value | Implied Price |
|-------|--|
| 13.1x | \$85 |
| 12.5x | \$85 |
| 0.9x | \$37 |
| 0.8x | \$36 |
| 5.4x | \$77 |
| 5.4x | \$62 |
| | 13.1x 12.5x 0.9x 0.8x 5.4x |

Source: FactSet, HF Model

We place no weight on the P/E multiple due to it being less effective for companies with inconsistent earnings (all companies in the peer group have seen wide fluctuations in earnings historically). The price target displayed on the tear sheet is a blend of our FY2 EV/EBITDA and DCF estimates, where we assigned a 50% and 50% weight, respectively. We weight EV/EBITDA heavily given it accounts for debt and non-cash charges (capital intensive industry with large property portfolios).

Source: FactSet, HF Model

Summary

We place a 50% weight on our DCF model and a 50% weight on relative valuation. In our view, BYD is slightly overvalued, and the risks of falling behind relative to online gaming pure plays due to maintenance and repairs of existing properties outweigh the potential growth drivers for the stock.
