

SAET Satellite Workshop B
"Game Theory and Applications"

Location: Waseda University, Building 11, Room 703

Date and Time: 22 August 2014, 10:00 to 15:20

This workshop is dedicated to recent developments in experimental economics and cooperative game theory. It consists of two parts. The experimental part is in the morning and the cooperative game part is in the afternoon. The organizers of the morning part and afternoon part are Yukihiro Funaki (Waseda University) and Hans Peters (University of Maastricht), respectively. Each talk (including a short discussion) is 40 minutes long.

The titles of the presentations and the names of the speakers are:

1. (10:00 - 10:40): *No harm in asking? Opening proposals and outcomes of unstructured bargaining*, Jana Vyrastekova (Radboud University Nijmegen)
2. (10:40 - 11:20): *Achieving Efficient Coordination Via Cheap-Talk: The Role of Incentives to Lie*, Subhasish Dugaer (University of Calgary)
3. (11:20 - 12:00): *Strategic uncertainty and cognitive ability in an experimental asset market*, Nobuyuki Hanaki (Aix-Marseille University)

Lunch Break: 12:00 to 13:20

4. (13:20 -14:00): *Expectation formation rules and the core of partition function games*, Francis Bloch (University Paris I Panthéon-Sorbonne)
5. (14:00 - 14:40): *Order Monotonic Solutions for Generalized Characteristic Functions*, Rene van den Brink(VU university Amsterdam)
6. (14:40 - 15:20): *The k-additive core and general solution concepts*, Michel Grabisch (University Paris I Panthéon-Sorbonne)
